

# Worklight

STANDARD's Worklights are ideal for projects where portable and temporary lighting is required, especially to provide a safe working environment when handling repairs, general maintenance or new construction. Find the perfect solution to illuminate your work area, whether it's for a wide area or to perform a specific task in a precise location.

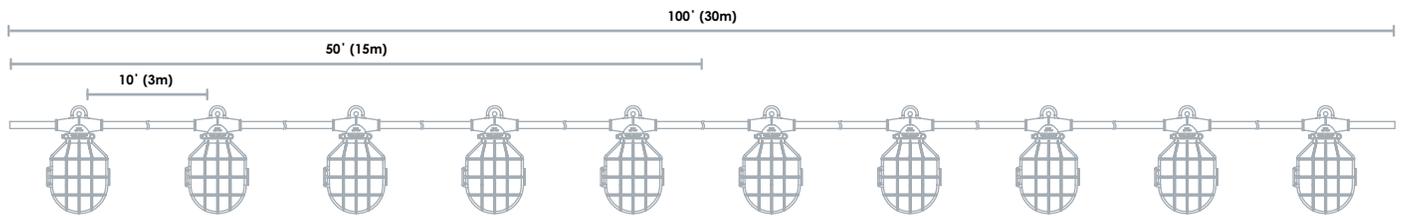

STANDARD's temporary lighting products are made of robust material that are perfect for a rugged construction site where traditional lighting products would break easily.

# String Light

STANDARD's String Lights come in lengths of 50 feet (15 m) and 100 feet (30 m) and are made of 12 or 14 AWG cable for heavy duty applications. As they can be daisy-chained, String Lights are ideal for jobsites where temporary lighting is needed for a wide area. Once the project is completed, they can be easily removed and transported to another location. Combine the String lights with STANDARD's wide range of LED A19 lamps.

Order code	Description	Wire Length		Wire	Maximum Watts per socket (W)	Volts (V)		Amperage (A)	Socket	Amount of sockets	Lamp guard material	Case qty (master)

# Trouble Light

STANDARD's Trouble Light will provide direct lighting for a smaller and specific area. It can be hung using the hook, which leaves your hands free while performing a task. Multiple Trouble Lights can also easily be daisy-chained using the 25-foot (7.5 m) cable and the receptacle on the handle. Combine the Trouble Light with STANDARD'S wide range of LED A19 lamps.

Order code	Description	Wire length		Wire	Maximum Watts per socket (W)	Volts (V)	Amperage (A)	Socket	Lamp guard material	Case qty (master)
		(ft)	(m)

<sup>1</sup>The recommended LED Lamps are suitable for damp location only.

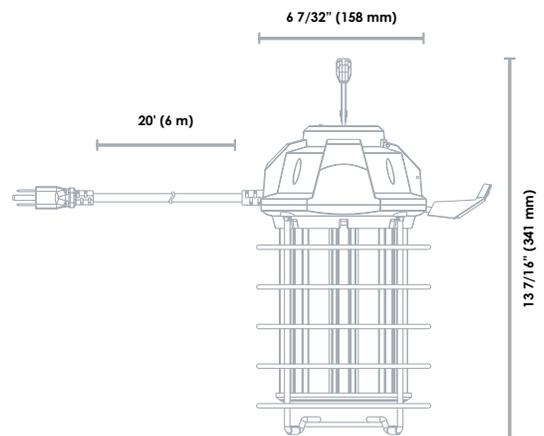

# Temporary LED High Bay

Replacing traditional Metal Halide HID lamps and fixtures with our 150 W Temporary LED High Bay fixture is a cost saving and energy efficient solution. The Temporary High Bay provides 360° illumination and will ensure that the work area is safe and fully illuminated. Moreover, its high efficacy will help reduce the number of luminaires needed; in addition, the daisy chain feature will enable the use of one outlet to power up to four luminaires .

Order code	Description	Watts (W)	Volts (V)	Colour temp.	Wire	CRI	Lumen output (lm)	Beam angle (°)	Life L70 (hrs)	Operating position	Case qty (master)
67046	THB/DSC/150W/CW/ND/OR/STD	150	120	Cool White	18AWG / 3C	80	15 000	360	50 000	Universal	4

09

A wireless remote control is also provided with every temporary LED high bay. Control all your luminaires, from only one remote if you desire!

Lumen values are derived from photometric testing

# Portable LED Flood Light

Portable Flood Lights are easy to carry from one location to another as they are battery powered and highly versatile. They offer pre-set intensities to disperse the right amount of light for each task and to ensure more efficient battery consumption. Their cordless feature keeps the ground free of cables, which creates a safer work environment. This product can be used on jobsites where electricity has yet to be installed.

<sup>1</sup>Only the battery of the 20W Flood can be removed and replaced, the battery of the 50W can't be interchanged as it is integrated in the luminaire.

# AC Flood Light

STANDARD's AC Flood Lights of 30 W and 50 W are the perfect combination of durability and efficiency. Offering a high light output and designed for wet locations, with an IP rating of 65, these luminaires will suit the most robust construction sites. Magnetic feet are also available as accessories, allowing the AC Flood Lights to stick to any metallic surface. In addition, up-to three Flood Light can be installed on the tripod.

Order code	Description	Watts (W)	Volts (VAC)	Colour temp.	Wire	CRI	Light output (lm)	Beam angle (°)	Life L70 (h)	Case qty (master)
