

SharkBite® Silicone Wrap

DESCRIPTION

SharkBite® silicone wrap is for use on brass fitting when buried.

FEATURES AND BENEFITS

Strong and corrosion resistant:
stretches up to 300%.

TYPICAL INSTALLATION

Make a SharkBite connection ensuring pipe is inserted to proper depth. While leaving the protective film in place, measure the amount of tape needed to completely wrap the fitting. To ensure a proper seal, overlap tape by 1" past the end of the fitting on every end and ¼" – ½" between across the fitting. Wrap the fitting by pulling the tape tight and removing the protective film. Completely cover the fitting. The tape will bond to itself within minutes and will cement to itself within a few hours.

SPECIFICATION DATA

Performance:

Working Temperature..... -65°F to +500°F (-54°C TO +260°C)

Thickness..... 0.02" thickness

Materials:

Tape Silicone Rubber
