HOW TO TERMINATE A TOOL-LESS KEYSTONE MODULE

MATERIALS REQUIRED:

MST-501 (1) Adjustable Cut & Strip Tool
TM313-8C5EBL (2) Tool-Less Keystone RJ-45 Module
FT4-4PC5EBL (1) Solid 24AWG Wire UTP 4 Pair Cat 5E
TP350 (1) Wire Map Tester

Step 1:
Cut the specified length of UTP wire required using the cut blades equipped with the Adjustable Strip Tool.

Step 2:
Strip away 3" of the jacket using the strip blades equipped with the Adjustable Strip Tool exposing the insulated UTP conductors. Using the RIP cord strip and additional 3" of jacket.

Step 3:
Use your thumb and index finger to straighten each pair placing them in the desired wiring configuration. Place a pencil between each pair to help untwist the pairs.

Step 4:
 Hold the cable firmly using your thumb and index finger at the base of the cable. Cut the insulated conductors at a 90 degree angle 3/4" from the edge of the jacket using the Adjusting Cut & Strip Tool.

Step 5:
Remove the locking clip and open the hinged door of the Tool-Less Keystone RJ-45 Module. Carefully insert 1 pair at a time into the cavity on a 45 degree angle until the tip of the wires reach the IDC contacts inside the connector. Close the hinged door to terminate each pair.

Step 6:
Repeat Step 5 one pair at a time from left to right until all 4 pairs are terminated and then replace the locking clip.

Step 7:
Verify the terminated cable assembly by inserting a test patch cord into both ends of the cable assembly and the other ends into the Tester and Remote unit of the Tester.

Step 8:
Insert Module into designated work station wall plate, surface box or patch panel plate.

Step 9:
Document the results and label the cable with a Inventory Number and Production Code for future reference.

DB09, DB15 & DB25 CONNECTORS

D-SUB HOODS

D-SUB MALE CRIMP PINS
This male crimp pin is designed to accept 19-22AWG cable and will fit any TSOC crimp d-sub connector.

Part #: **TM-70M**
Colours: N/A   Unit of Measure: 100/ PKG

D-SUB FEMALE CRIMP SOCKETS
This female crimp pin is designed to accept 19-22AWG cable and will fit any TSOC crimp d-sub connector.

Part #: **TM-70F**
Colours: Silver/Gold   Unit of Measure: 100/ PKG

DB09 CRIMP CONNECTOR SHELL
This 9 pin d-sub connector is designed to fit any TSOC hood kit.

Part #: **TM-7109F**   (FEMALE)
Part #: **TM-7109M**   (MALE)
Colours: Black   Unit of Measure: EA

DB15 CRIMP CONNECTOR SHELL
This 15 pin d-sub connector is designed to fit any TSOC hood kit.

Part #: **TM-7115F**   (FEMALE)
Part #: **TM-7115M**   (MALE)
Colours: Black   Unit of Measure: EA

DB25 CRIMP CONNECTOR SHELL
This 25 pin d-sub connector is designed to fit any TSOC hood kit.

Part #: **TM-7125F**   (FEMALE)
Part #: **TM-7125M**   (MALE)
Colours: Black   Unit of Measure: EA

DB09 HOOD W/ HARDWARE
This two piece plastic hood kit is designed to accept any TSOC 9 pin d-sub connector.

Part #: **TM-7209GY**   (PLASTIC)
Part #: **TM-7309CR**   (METALIZED PLASTIC)
Part #: **TM-7409DM**   (DIE CAST METAL)

TOOLS

COAX CRIMP TOOL
This ratchet type tool is designed to terminate any **TSOC** F type crimp connector for RG-59 & RG-6 coaxial cable.

Part #: **CT-RG59/6**
Colours: Red   Unit of Measure: EA

COAX COMPRESSION TOOL
This ratchet type tool is designed to terminate any **TSOC** F type compression connector for RG-59 & RG-6 coaxial cable.

Part #: **CT-RG59/6SS**
Colours: Red   Unit of Measure: EA

ENCHANCED COAX COMPRESSION TOOL
This ratchet type tool with changeable dies is designed to terminate any **TSOC** F, RCA and BNC type compression connector for RG-59 & RG-6 coaxial cable.

Part #: **CT-RGSSA**
Colours: Red   Unit of Measure: EA

COAX COMPRESSION TOOL
This ratchet type tool is designed to terminate any **TSOC** F type compression connector for RG-11 coaxial cable.

Part #: **CT-RG11SS**
Colours: Red   Unit of Measure: EA

TOOLS

COAX CABLE PREP TOOL
Adjustable strip tool for RG-59 and RG-6 coaxial cable.

Part #: **MST-332**

Colours: Silver   Unit of Measure: 10/ PKG

F-TYPE COMPRESSION CONNECTOR
This F type compression connector is suitable for FT-4 rated RG6 coaxial cable.

Part #: **TMRG-6FCONSS**
Part #: **TMRG-6FCONSS2**

Colours: Silver/Yellow   Unit of Measure: 10/ PKG

GILBERT LOCKING CONNECTOR
This theft proof connector is designed to protect any unused active ports on field equipment.

Part #: **TMRG-LT1 (**includes resistor**)**
Part #: **TMRG-LT2** (no resistor)
Colours: N/A   Unit of Measure: EA

F CONNECTOR LOCKING TOOL
This tool is designed to install/remove the TMRG-SLK1 F-Connector Lock.

Part #: **PT-SLK1**
Colours: N/A   Unit of Measure: EA

F CONNECTOR LOCK
This theft proof connector is designed to protect any RG59 or RG6 F type cable assembly from being removed.

Part #: **TMRG-SLK1**
Colours: N/A   Unit of Measure: EA

CONNECTORS

F-TYPE COMPRESSION CONNECTOR
This F type compression connector is suitable for quad shielded FT-4 rated RG6 coaxial cable.

Part #: **TMRG-6QFCONSS**
Colours: Silver/ Blue   Unit of Measure: 10/ PKG

F-TYPE CRIMP CONNECTOR—PLENUM
This F type crimp connector with 1/2" attached ferrule is suitable for FT-6 rated RG6 coaxial cable.

Part #:**TMRG-6CONPL**
Colours: Silver   Unit of Measure: 10/ PKG

TWIST TYPE CONNECTOR
This F type twist connector with 1/2" attached ferrule is suitable for FT-4 rated RG6 coaxial cable.

Part #: **TMRG-6CONTW**
Colours: Silver   Unit of Measure: 10/ PKG

F-TYPE CRIMP CONNECTOR
This F type crimp connector with 1/2" attached ferrule is suitable for FT-4 rated RG59 coaxial cable.

Part #: **TMRG-59CON**
Part #: **TMRG-59CONWP**   Weather Proof
Colours: Silver   Unit of Measure: 10/ PKG

CONNECTORS & KEYSTONE MODULES

BNC TYPE TWIST CONNECTOR - RG59
This BNC type twist connector with 1/2" attached ferrule is suitable for FT-4 rated RG59 cable.

Part #: **TMRG-59BCONTW**
Colours: Silver   Unit of Measure: EA

BNC TYPE TWIST CONNECTOR - RG6
This BNC type twist connector with 1/2" attached ferrule is suitable for FT-4 rated RG6 cable.

Part #: **TMRG-6BCONTW**
Colours: Silver   Unit of Measure: EA

BLANK KEYSTONE MODULE
This keystone module is used to fill unused ports in any TSOC keystone outlet.

Part #: **TM314-BLNIV-EA**
Part #: **TM314-BLNWH-EA**
Colours: White & Ivory   Unit of Measure: EA

AUDIO KEYSTONE MODULE
This binding post module is designed to accept 14-26AWG speaker cable and will fit any TSOC keystone outlet.

HOW FIBER OPTIC CABLES WORK

The traditional method of data transmission over copper cables is accomplished by transmitting electrons over a copper conductor. Fiber Optic cables transmit a digital signal via pulses of light through a strand of glass. The core is surrounded by a cladding which reflects the light back into the core and eliminates light from escaping the cable.
A fiber optic link works in the following manner. At the one end, the fiber cable is connected to a transmitter. The transmitter converts electronic pulses into light pulses and sends the optical signal through the fiber cable. At the other end, the fiber cable is plugged into a receiver which decodes the optical signal back into digital pulses.

Advantages
Increased bandwidth, extended cable ring, light weight and EMI immunity.

Recommended Cable Lengths
Singlemode: 5-6KM
Multimode: 1-2KM

Page 65

MULTIMODE VS. SINGLEMODE FIBER

A "mode" in Fiber Optic cable refers to the path in which light travels. Multimode cables have a larger core diameter than that of singlemode cables. This larger core diameter allows multiple pathways and several wavelengths of light to be transmitted. Singlemode cables have a smaller core diameter and only allow a single wavelength and pathway for light to travel. Multimode fiber is commonly used in patch cable applications such as fiber to the desktop or patch panel to equipment. Multimode fiber is available in two sizes, 50 micron and 62.5 micron. Singlemode fiber is typically used in network connections over long lengths and is available in a core diameter of 9 microns (8.3 microns to be exact).
50 micron vs. 62.5 micron fiber
Both 50 micron and 62.5 micron fiber optic cables use an LED or laser light source. They are also used in the same networking applications. The main difference between the two is that 50 micron fiber can support 3 times the bandwidth of 62.5 micron fiber. 50 micron fiber also supports longer cable runs than 62.5 micron cable.

Simplex vs. Duplex Cable
Simplex cable consists of a single fiber optic strand. Data is transmitted in only a single direction, transmit to receive. Duplex cable consists of two fiber optic strands side-by-side. One strand goes from transmit to receive and the other strand connects receive to transmit. This allows bi-directional communication between devices.
