

TECHNICAL DATA SHEET

Bullet[®] liquidtight fittings Liquidtight flexible non-metallic conduit

Engineered to meet the demand for a tough, reusable, non metallic liquidtight fitting.

Certifications / Standards:

01 straight LT38P black fitting

02 90° LT38P black fitting

Features:

- Connect assembles to conduit without disassembly
- Designed to be installed with a positive installation criteria (gland bottoms on body shoulder)
- Rugged low profile non-metallic body and gland construction
- Captivated sealing "O" ring with predetermined compression for a reliable seal at enclosure
- Connector ferrule designed to accept variations in conduit inside diameter and is tolerant of field conduit cuts
- Designed to reduce friction between conduit I.D. and ferrule allowing conduit to seat properly for effective seal
- Easy installation
- Provides a double sealing action
- Elongated gland nut profile designed to provide additional strain relief for 90° pull and an easy hand grip
- Performance unaffected by exposure to detergents, cleaners, and sanitizers commonly encountered in food processing plants and tropical industrial environment.
- Performance unaffected by cutting fluids, wiring pulling compounds and Marine environment
- Meets industry standards for cold impact

Applications:

• A series of non-metallic connectors designed to provide a liquidtight seal when terminating liquidtight non-metallic conduit (UL Type B) or non-metallic tubing to a box or enclosure with knockout opening or a threaded hub

Conforms to:

- C.S.A. 22.2 No. 227.2 & No. 227.3
- ANSI/UL514B
- Watertight requirements of Type 4 and Type 6 enclosures
- Federal Standards H28 (NPT threads)

Material / Materials / Finishes

- Body Gland-Weather stabilized thermoplastic (black)
- "O" Ring Nitrile (blue)
- Locknut Steel/ electro zinc plated
- Matl. temp. rating Thermoplastic 40°C to 105°C
- Material Flammability Rating: UL94-V2

Temperature range:

• -18°C to +105°C (-2°F to +221°F)

Chemical resistance:

See publication TDS000081
