- Upright positionable Bit-Checks convince due to their functionality in a minimum of space
- Universal holder with quick-release chuck for rapid bit change
- Hex-Plus allows socket head screws to live longer
- Tough viscous bits for universal use
- In handy and robust Bit-Check

Robust Bit-Check by Wera. Bit-Checks provide a quick overview of the tools available. Bits not needed are simply reinserted into the set and do not get lost. Simple transportation e.g. in the shirt pocket. The Hex-Plus profile offers a greater contact surface in the head of the screw. The notching effect is therefore reduced to a minimum and damage to the screw head more or less eliminated. Tough viscous for universal use. Includes universal holder for the take-up of bits with 1/4" hexagon head drive as per DIN ISO 1173-C 6.3. Comes with quick-release chuck for rapid bit change; the strong permanent magnet holds the bits absolutely securely.

At the workplace

The Bit-Checks can be positioned upright at the workplace so the tool is always quickly to hand.

Hex-Plus

Hexagon socket screws are a problem, because the contact surfaces that transfer the force of the tool to the screw are very narrow. The consequence: the head of the screw can be damaged, usually rounding out the recess. Hex-Plus tools have larger contact surfaces to prevent this, driving from the flats of the recess, rather than the corners. Good to know: Hex-Plus tools fit into every standard hexagon socket screw!

Tough-absorbing bits

Tough-absorbing Wera bits (Z) prevent any premature breakage of the drive tip.

With quick-release chuck and strong permanent magnet

For a firm, wobble-free connection between holder and bit with quick-release action. Simply push sleeve forward to change bits. The magnetic design enables simplified positioning of the screw.
