

## Bit-Check 30 Impaktor 1, 30 pieces

### Bit-Checks Impaktor

<b>EAN:</b>	4013288156778	<b>Size:</b>	165x85x35 mm
<b>Part number:</b>	05057690001	<b>Weight:</b>	274 g
<b>Article number:</b>	Bit-Check 30 Impaktor 1	<b>Country of origin:</b>	CZ
		<b>Customs tariff number:</b>	82079030

- Upright positionable, multi-component Bit-Check
- Impaktor technology for above-average service life
- Particularly suitable for use with customary impact drivers
- Diamond coating for a secure fit in the screw, literally bites into the screwhead to prevent cam-out
- Holder with ring magnet for holding longer and heavier screws

1 Impaktor holder with retaining ring and ring magnet, 29 Impaktor bits. The Impaktor technology offers an above-average service life even under extreme circumstances thanks to the best possible utilisation of the material properties and the optimised geometry; particularly suitable for use with customary impact drivers; holder with ring magnet for simple holding of even longer and heavier screws, ideal for overhead work. The rough diamond-coating of the bits reduces the risk of a slipping out of the screw head thanks to the enhanced frictional resistance.

#### At the workplace

Impaktor technology for an above-average service life even under extreme demands

The Bit-Checks can be positioned upright at the workplace so the tool is always quickly to hand.

#### Improved productivity

For use with impact screwdrivers. Improve productivity when screwdriving with power tools.

#### Above-average service life

Maximum utilisation of the material properties, a very special geometry – designed particularly to meet the extreme demands – as well a specific manufacturing process mean that Wera Impaktor tools have an above-average service life.

### Impaktor-Bits

For an above-average service life. Maximum utilisation of the material properties, a very special geometry – designed particularly to meet the extreme demands – as well as a specific manufacturing process mean that Wera Impaktor tools have an above-average service life. Another product advantage is the coating of the Impaktor bits with minute diamond particles. These diamond particles reduce the cam-out effects – particularly high in power tool applications – which can lead to a slipping out of the screw head. The diamond particles literally bite themselves into the screw recess. This means that less contact pressure is required, something that greatly delays fatigue setting-in in power tool screwdriving jobs.

### Torsion zone

Torsion zone specially designed to absorb such forces and thereby protect the bit tip.

### Impaktor holder with ring magnet

The Impaktor holder with ring magnet additionally holds longer and heavier screws absolutely securely. This enables a speedy and dependable positioning of the screw. It is also ideal for above-head work. Should the magnet function not be required in a particular situation e.g. when working with metal, it can be extracted from the screwdriving area and can thereby be "disabled". Mainly used in manual power tool applications.

### TriTorsion system

The combination of the double torsion zones in the Impaktor holder and the torsion zone in the Impaktor bit result in the so-called TriTorsion system.
