FLUSH VALVE INTRODUCTION

Zurn is proud to offer a broad selection of manual and sensor flush valves to meet building owners' and facilities managers' wide variety of needs. Our EcoVantage® water-conserving valves lead the industry with the highest levels of performance while maximizing water savings. We were the first to launch the pint urinal, and we're still leading the market with our Omni-Flo™ urinal and 1.1gpf AquaVantage® flush valves. And with a wide variety of technologies and installation types, specifiers are sure to find a product to suit their applications.

AquaVantage® AV Diaphragm Flush Valves

Zurn AquaVantage flush valves feature a chemical and clog-resistant triple filter diaphragm, ensuring that the contaminants in your water won't clog the diaphragm over time. Like all Zurn diaphragms, these are made from Zurn's GO BLUE! thermoplastic elastomer material, designed to last up to 10 times longer than the competition. AV flush valves come standard with an ADA-compliant sensor or handle, vandal-resistant control stop cover, high-pressure vacuum breaker, and cast wall flange with set screws. All components can be purchased separately as replacement parts or as retrofit kits to provide any Zurn or Sloan diaphragm flush valve with the AquaVantage®.

Aquaflush® PLUS PL Flush Valves

The Aquaflush PLUS PL series offer Zurn's chloramine-resistant TPE diaphragm with a clog resistant bypass, ADA compliant valve with a non-hold open handle or sensor, cast wall flange with set screw, vandal-resistant control stop cover, high-pressure vacuum breaker, and sweat solder kit.

Aquaflush® Z6000 Series Flush Valves

For those applications that do not require the advanced features of Zurn's AquaVantage® AV line, the Z6000 Series is supplied with ADA handle and standard control stop cover with stamped wall flange and chemical-resistant diaphragm kit.

ZTR Sensor Piston Flush Valves

Zurn's ZTR sensor piston flush valve series provides a high-performance flushing system with unsurpassed water savings, all in a contemporary, streamlined design. The ZTR is equipped with chloramine-resistant internal seals which reduce maintenance costs, while flow rates as low as 1.1gpf (closets) and 0.125gpf (urinal) save 30% more water than typical 1.6gpf bowls.

ZTR piston flush valves come standard with chemical and clog-resistant components, ADA-compliant sensor activation, cast wall flange with set screw, vandal-resistant control stop cover, high-pressure vacuum breaker, and sweat solder kit. This product can be installed for new construction or retrofitted to existing installations to lower building costs and provide long-term savings.

Metroflush® Manual Piston Flush Valves

Zurn Metroflush® manual piston flush valves are equipped with a chloramine-resistant piston with clog-resistant filtered bypass, and chemical-resistant gaskets and seals for extended service life with lower maintenance costs.

ACTUATION

Manual

Requiring direct contact from the user to activate a flush via a handle, push button, or foot pedal actuator; these valves are the cornerstone of the Zurn flush valve portfolio. Manual valves can be either diaphragm or piston operated.

Sensor

Zurn's AquaSense® sensor technology provides reliable actuation through a continuous infrared beam that can detect the difference between a fixture user and passersby. Sensor placement can be integral to the valve or wall-mounted in a concealed application. With battery or hardwire power options, sensor valves can be either diaphragm or piston operated.

Hydraulic

Utilizing hydraulic pressure, this style requires manual activation to trip a non-hold-open type hydraulic push button actuator that may be located up to 36" from the valve. Hydraulic valves are diaphragm operated.

Power Options

Hardwire, Battery and Long-Life Battery (-LL)

Most Zurn sensor flush valves are available in either battery or hard-wired configurations, depending on the installation requirements. Some valves, noted with a -LL suffix, offer a 10-year lithium battery option for long-life installations.

Exposed vs. Concealed Installations

Exposed flush valves offer ease of access and utility for everyday projects, with all working components in view. These installations are the most common, with easier access for servicing and retrofit.

Concealed flush valves such as the ZEMS line of valves bring the everyday reliability of exposed valves to those situations where aesthetics and security lead over function. Consider adding an access panel to provide quick and simple access to in-wall concealed flush valves while maintaining the discreet appearance.

This full freight allowance applies when the shipment is within Canada and has a single destination of a buyer's standard address or job location. Routing of shipment shall be determined at the sole direction of Zurn. Shipping dates are estimates and time of delivery shall not be of the essence of this sale contract. Under no circumstances will the Seller have any responsibility on account of any delays in manufacture, transportation, or otherwise. Terms of Export Shipment on application.

Please contact our customer service department for guidance on potential additional shipping charges.

These charges and restrictions apply in addition to Zurn standard terms and conditions for sale unless otherwise agreed upon by the parties.
