

# TYPICAL INSTALLATION Z189 SCUPPER DRAIN

Dimensional Data (inches and [ mm ]) are Subject to Manufacturing Tolerances and Change Without Notice

## Z189 SCUPPER DRAIN

Drain is illustrated with regularly furnished combination grate & membrane clamp. The Zurn scupper drain can be installed in most roof construction. Dimensional data is shown in the Engineering Handbook and on the Zurn submittal drawings. The drain body is secured to the pipe by a threaded connection or a no-hub connector. The type of connection must be specified upon ordering. The waterproofing membrane is to run up to and over the clamping flange area. The clamping collar is then placed on the drain and then secured. The design and method used for the installation of roofing materials is by others. For other available scupper drains, see Z160, Z161 & Z187.
