System Feeders

DMF150

MF200

DMF300

SF100

Axiom System Feeders are designed to simplify the process of maintaining the cold static fluid pressure in closed-loop heating and cooling systems. Having a reservoir of suitable make-up fluid eliminates the need for backflow prevention and helps solve many of the associated problems when using domestic water as a make-up fluid.

APPLICATIONS:

System Feeders are ideal for boiler/chiller systems, snow/ice melt circuits, outside air heating/cooling glycol coils, geothermal and solar heating systems.

Features and Benefits

- Automatically maintains a minimum system pressure at a user defined setting
- Feeders are compatible with both water and glycol/water solutions
- **Provides leak detection** dropping fluid level provides immediate notice that the system is losing fluid
- **Prevents major floods** in the event of a system rupture, only the contents of the tank will be pumped into the system
- All units plug into any standard 115 VAC outlet
- Diverter valve allows easy purging of air on initial start-up and manual mixing of fluid in the tank
- Fluid drained for service from the system can easily be recovered and used to replenish the system following service
- Fluid level switch shuts the pump off if the storage tank level gets too low
- Does not require any annual recertification testing

ACCESSORIES

Alarm Panel

Hydro-NODE

SF100 Specialty Build Options (SF100-x-xx):

- HP-L (100 USG, 25-85 PSI)
- 2PRV (Unit Designed for 2 Systems)
- 2PRV-L (100 USG, 2 Systems)
- **2PRV-HP** (25-85PSI, 2 Systems)
- D-P-4x (Dual Pump, Alternating Control Panel NEMA4X)
- UHP (35-125 PSI)
- UHP-L (100 USG, 35-125 PSI)
- D (Dual Pump)
- D-2PRV (Dual Pump, 2 Systems)
- D-P (Dual Pump, Alternating Control Panel)

Custom units available upon request

System Feeder Selection Chart

Which System Feeder is right for you?

Use the calculator below to determine which System Feeder will best suit your application.

Feeder-Sizer

System Details:

Total System Volume (gal.):

Cold Static Fill Pressure (psi):

Select

Model	System Volume	System Cold Static Fill Pressure
DMF150 (4.5 USG)	Below 285 L (75 US Gal)	0 to 310 kPa (0-45 psig)
MF200 (6 USG)	Below 285 L (75 US Gal)	69 to 170 kPa (10-25 psig)
DMF300 (17 USG)	285-1135 L (75-300 US Gal)	0 to 310 kPa (0-45 psig)
SF100 (55 USG)	1135-3030 L (300-800 US Gal)	35-380 kPa (5-55 psig)
SF100-HP (55 USG)	1135-3030 L (300-800 US Gal)	170-585 kPa (25-85 psig)
SF100-L (100 USG)	Above 3030 L (800 US Gal)	35-380 kPa (5-55 psig)

PURO (PAL)

Demineralizers prevent valuable metal components in closed loop hydronic systems from corroding and scaling

H₂O Demineralizer Benefits

- Removes scale producing ions like calcium and magnesium that reduce boiler efficiency and can lead to heat exchanger failure
- Removes aggressive salts such as:
 - Nitrates which cause corrosion
 - Sulphates which attack copper piping
 - Chlorides which cause stress corrosion cracking in stainless steel
- Lowers electrical conductivity, which reduces corrosion by slowing the rate of oxidation
- Demineralized water meets the strict water quality requirements from boiler and glycol manufacturers
- An economical and convenient alternative to pre-blended/diluted glycol

Typical glycol manufacturers dilution water quality requirements are <100 ppm TDS, <25 ppm of chlorides, and <25 ppm of sulphates.

Boiler manufacturers water quality requirements can be as low as 50 ppm TDS for system fluid.

H₂O Demineralizers

Disposable cartridges are ideal for use on job specific residential and light commercial water treatment applications. Use the PuroPal series of Disposable catridges to provide demineralized water rather than paying a premium and transporting treated water to site or purchasing preblended glycol solutions. Simply carry the cartridge inside, hook up to the site's water supply with garden hose connections, and begin delivering demineralized water through the PuroPal cartridge's ion-exchange resin.

DISPOSABLE CARTRIDGES

PuroPal-1

PuroPal-1

- Disposable cartridge with a translucent exterior
 - When media is expired the resin will change from blue to beige
- Designed for single point of use applications
 - One PuroPal-1 cartridge will treat approximately 65 USG (inlet water 200ppm)

PuroPal-1000

PuroPal-1000

- Robust design, easy to handle
- Larger cartridges provide increased treated fluid volume
- Cartridge can be used with the PuroPal-Meter accessory to accuretly measure treated fluid volume
- One cartridge will treat approximately 265 USG (inlet water 200ppm)

ACCESSORIES

PuroPal-Meter

Flow and Conductivity Meter

H₂O Demineralizers

MOBILE FILLING UNITS

integrated metering and intelligent controls, convenient drain valve allows for ease of transportation and storage. Ideal for larger (or multiple smaller) closed-loop systems, Mobile filling units provide the most economical method to providing demineralized water at individual job sites.

PuroPal Leader

PuroPal Leader

PuroPal Pro-50

- Small footprint, floor standing mobile filling unit.
- PuroPal Console provides a real-time digital display of the incoming and outgoing water quality, flow rate and the total treated demineralized water

PuroPal Pro Series mobile filling units incorporate a robust design with

- Resin is self-contained in field replaceable cartridges, meaning down-time is mere seconds when exchanging the cartridge
 - One cartridge will treat approximately 793 USG (inlet water 200ppm)

• • • •

- Commercial grade and high capacity stainless steel demineralizing cart
- Comes with inlet & outlet conductivity meter, flow meter, and blending valve for specific water treatment requirements
- ♦ 50L canister treats approximately 1,775 USG (inlet TDS 200ppm)

PuroPal Pro-50

PuroPal Complete-2

MAKE-UP WATER UNITS PuroPal complete series make-up water demineralization units are the ideal solution for fixed placement applications when used to provide 'top-up' treated water in closed-loop hydronic systems. All Axiom make-up water demineralizers utilize a replaceable ion-exchange mixed-bed resin to ensure that the delivered fluid is a high quality (low conductivity) H₂O source.

- High grade stainless steel cylinder houses replaceable mixed-bed resin
- Active Flow and Conductivity Meter (shown below)
 - LED light indicates when delivered fluid exceeds user-defined limits
 - Tracks the total amount of fluid that has been treated
- Each unit also includes:
 - Robust shut off ball valves
 - Integral float-style air vent reducing the amount of entrained air
 - Piping connection hardware

PuroPal Complete-2

- Small footprint, with integral wall mount bracket demineralizing station
- 2L resin canister will treat approximately 55 USG (inlet water 200ppm)

PuroPal Complete-12/50

- Floor Standing demineralizing stations
- Stainless Steel Braided Connection Lines with ball valves
 - Comp-12: 12L Canister treats approximately 480 USG (inlet TDS 200ppm)
 - Comp-50: 50L Canister treats approximately 1,775 USG (inlet TDS 200ppm)

PuroPal Complete-12/50

Active Flow and Conductivity Meter

Puro	PAK Options	PuroPAK-P	PuroPAK-CP

Protect 1	Provide lasting protection against corrosion and scale formation	3	3

Another innovative product from Axiom

NC-1W

JOINS OUR FAMILY OF CONDENSATE NEUTRALIZERS

Ideal for condensing appliances

Condensate Neutralizers

NC-1

NC-2

NC-1W

Condensate fluid that is formed inside fuel burning appliances is acidic and has the potential to harm the environment and drainage systems. Axiom condensate neutralizers:

- Raise the pH level of the acidic condensate to a more neutral level which:
 - Prevents acidic fluid from damaging drains, sewer systems and concrete
 - Helps maintain a safe environment for bacteria in septic systems
- Made with corrosion resistant materials for long term durability
- Tanks and capsules come with connection hardware kits
- Includes an initial charge of Axiom's unique blend of LipHter⁺ neutralizing media

NeutraPal Series are designed with versatility in mind. Units can be either floor or wall mounted and are ideal for use with gas burning condensing appliances with low condensate outlets.

Features

- Compact capsules minimize the overall footprint
- Offset outlet connection increases the fluid contact time with LipHter[†] media for maximum performance
- Ideal for residential and light commercial appliances (up to 1,000,000 btu/h)
- Three available kit options
 - NC-1 & NC-2 "Full Kit" comes with connection hardware and tubing.
 - -NC-1S & NC-2S "Hard Pipe Kit" comes with ³/₄ PVC socket adapters
 - -NC-1W "Wall Hung" Neutralizer

NeutraPro Series are designed to neutralize large volumes of acidic condensate at higher flow rates. They are constructed of corrosion resistant polypropylene material and include 1" NPT PVC union connections.

NeutraPro

- Ideal for commercial gas-burning appliances (up to 7,000,000 btu/h)
- Integral bypass feature prevents condensate backflow

Neutra Pump

NEW

NT₁-P

NT25-P18

NeutraPump Series are designed for the dual purpose of neutralizing acidic condensate and pumping the fluid to a suitable location

Features

- Integral baffles force the acidic fluid through Axiom's LipHter⁺ media for maximum neutralization
- Pumps come with auxiliary dry contacts in event of a high-level fluid condition
- Pumps are ETL certified and come with standard 120v plug-in connection

NT1-P Features

- Ideal for residential or light commercial appliances (up to 500,000 btu/h)
- Low profile design that can be wall or floor mounted with multiple connection options:
 - Two connections that direct fluid through LipHter + media
 - One connection that bypasses neutralizing media
- Pump is capable of 20-feet of vertical lift

NT25-P18 Features

- Ideal for commercial appliances
- Pump is capable of 18-feet of vertical lift at design flow rate
- 1" NPT condensate inlet connection

NT70-P Features

- Ideal for large commercial and industrial appliances
- Pump is capable of 22-feet of vertical lift at design flow rate
- 1 ½" NPT condensate inlet connection

NT70-P

Hydronic System Cleaners and Inhibitors

CLEANING AND PROTECTION FOR CLOSED LOOP HYDRONIC SYSTEMS

Suitable for all kinds of closed loop hydronic heating and cooling systems: traditional hydronic heating systems, chilled water systems, and geothermal systems.

Features and Benefits

- Eco-friendly chemicals do not contain harmful or hazardous substances
- Easy to use. The heating system can be cleaned both with the boiler on or off
- Neutral pH does not corrode or damage gaskets, plastics, or metals (steel, copper, and aluminium)
- Keeps the heat exchanger, pipes, and radiators clean
- Low concentration requirements (0.5 L or 16.9 oz. treats 100 L or 25 U.S. gallons of water. Dosage: 0.5%)
- Provides energy savings by reducing fuel consumption A clean heat exchanger is a happy exchanger
- Restores heat transfer and water circulation to their original levels
- Reduces maintenance costs. Proper fill and inhibitors lead to longer running systems

PROTECT 1

SYSTEM CORROSION AND SCALE INHIBITOR

Provides energy savings by protecting against corrosion and lime scale. Suitable for use with all metals (steel, copper, and aluminum).

Dosage: 0.5%

Available in 500mL, 2L, 20L

CLEAN 3

SYSTEM CLEANER FOR <u>NEW</u> HYDRONIC SYSTEMS

Provides energy savings by removing oil residue and metal oxides from new hydronic systems.

Dosage: 0.5%

Available in 500mL, 2L, 20L

CLEAN 5

SYSTEM CLEANER FOR OLD HYDRONIC SYSTEMS

Provides energy savings by removing sludge and metal oxides from old hydronic systems.

Dosage: 0.5%

Available in 500mL, 2L, 20L

CLEAN 10

SYSTEM AND BOILER CLEANER

Provides energy savings by removing limescale, sludge, and metal oxide incrustations inside the boiler and hydronic system.

Dosage: 0.5%

Available in 5L, 20L

Boiler

Boiler water and fire side cleaners remove incrustations from boiler components without damaging metal or plastic parts.

WATER SIDE CLEANER

CLEAN BOILER

BOILER WATER SIDE CLEANER Removes metal oxides and limescale deposits from the water side of boiler's heat exchanger. Provides energy savings, reduces noise, and restores heat transfer to original levels.

Dosage: 10 to 20% Available in 1L

FIRE SIDE CLEANER

Axi-Therm unique combustion-side chemical treatments quickly help clean and restore the heat transfer area of condensing appliances back to near new levels.

- Restores combustion operating efficiency to near new levels by cleaning fume-side encrustations developed during the process of combustion
- Units come with extension nozzles to help access hard to reach areas inside heat exchangers
- > Chemical is formulated to help reduce time on-site by breaking the bond between encrusted combustion residue and the surface of the heat exchanger, Simply spray, let the treatment sit, brush and thoroughly rinse away

CLEAN F-STEEL

Combustion cleaner for stainless steel heat exchangers Available in 1L

Before

After

CLEAN F9-A

General combustion cleaner Available in 1L

After

CLEAN F9-AL

Two-step combustion cleaner for aluminum heat exchangers Available in 1L

PEX Tubing Organizer

PEX-Pal tubing organizer collects and organizes in-floor tubing used in high-mass radiant floor heating installations.

Features

- Units are designed as modular blocks that quickly and easily snap together to match the number of loops on the manifold
- Two-channel design positions both the supply and return piping with the appropriate spacing required for connections to the manifold
- Modules are constructed of a high impact strength plastic suitable to be embedded in a concrete slab

- Can be easily secured in place to available decking, rebar, readyrod, temporary manifold support or wooden forms prior to concrete being poured
- Designed to maintain manufacturers recommended minimum bend radius for 3/4" and smaller diameter plastic piping

Product	Description	Box Qty
PEX40	Two-channel tubing organizer module	40
EP10	EndPlate for PEX-Pal	10

Sidestream Filters

SFP SERIES

Hydronic Sidestream Filter Packages deliver effective ongoing protection against the damaging effects of debris in all types of closed-loop hydronic systems. Ensuring the fluid in a closed-loop hydronic system is clean helps reduce overall maintenance and operating costs of the system. Monitoring and maintaining clean hydronic system fluid is now simple and convenient.

Max Temperature: 200°F (93°C)
Max Pressure: 125psi (860kPa)

Connections:

SFP-10, FH-10 ³/₄" FNPT SFP-20, FH-20 1" FNPT

Features

- Brass and stainless-steel construction
- Manual balancing valve incorporates flow balancing with memory stop, filter cartridge isolation and an integral manual air vent
- Comes with standard DOE 25 micron cotton wound filter cartridge
 - 5 and 10 micron filter options available
- Filter Housing uses a double O-ring for reliable leak-free use
 - Includes ball valve drain valve with hose connection to ensure safe, mess free fluid handling
 - Can be used for chemical dosing up to 0.8 USG (3.0L)

Model	Connections	Sidestream Flow Rate	Filter Size	Filter Options (micron rating)	Vessel Volume
SFP-10 (FH-10)	³ / ₄ " FNPT	1-10 GPM (System <200GPM)	10" DOE cotton wound	5, 10, 25	0.4 gal (1.5L)
SFP-20 (FH-20)	1" FNPT	1-20 GPM (System <400GPM)	20" DOE cotton wound	5, 10, 25	0.8 gal (3.0L)

FH SERIES

ASFI SERIES

Sight Flow Indicators

Max Temperature: 200°F (93°C)
Max Pressure: 125psi (860kPa)

Connections:

ASFI-075 3/4" FNPT ASFI-100 1" FNPT

- Sight Flow Indicator provides a quick indication of the 'health' of the fluid and detects the presence of flow
- Rebuild kits available (glass, gaskets, and opening tool)

CHEMICAL BY-PASS FEEDERS Chemical by-pass feeder provides simple delivery of chemicals to any closed loop system

> Max Pressure and 265psi (1.83MPa) at 200°F (93°C) Temperature: 300psi (2.07MPa) models available

Connections: FNPT (3/4")

Features

- Allows for safe and easy chemical dosing
- Ball valves for easy chemical dosing and pot feeder isolation
- Graduated funnel with stainless steel filter for clean, accurate, and mess free chemical addition
- Pressure vessel and fittings made with brass and carbon steel
- 2 Gallon (7.6L) models comes with wall bracket
- 5 Gallon (18.9L) model comes with adjustable steel legs
- Models with wide opening for adding dry chemical are available

Model	Size	Pressure Vessel Volume	Max Pressure
CBF-2	3/4"	2 gal (7.6L)	265psi (1.83MPa)
CBF-5	3/4"	5 gal (18.9L)	265psi (1.83MPa)
CBF-2-SS	3/4"	2 gal (7.6L)	265psi (1.83MPa)

CBF-HP SERIES

CBF-2-SS

eatures

- AXIOM CBF-2-HP
- Fully accessible lid
- Maximum pressure rating is 300 psi

HIGH PRESSURE MODELS

Model	Size	Pressure Vessel Volume	Max Pressure
CBF-2-HP	3/4"	2 gal (7.6L)	300psi (2.07MPa)
CBF-5-HP	3/4"	5 gal (18.9L)	300psi (2.07MPa)

Hydro-NODE

Hydro-NODE

HydrodNODE

NEW

HN-1

HN-2

The Hydro-NODE is an easy connect bracket designed to mount critical hydronic system components in a convenient location.

Features

- **Securely mount critical hydronic components**
- Provides means for easy servicing of expansion tank
- Powder-coated for professional finish

HN-1

- Robust welded-steel bracket
- Bracket includes five individual NPT connections
 - Three ½" FNPT open connections
 - Two 1/4" FNPT open connections

HN-2

Includes the same robust welded-steel bracket as the HN-1 and comes fully assembled with the following connections:

- Three ½" FNPT ball valve connections
 - Expansion tank connection (suitable for up to 12" diameter tanks)
 - System feeder or fill inlet connection
 - Closed loop hydronic system connection
- Two 1/4" FNPT connections
