CAPT, CAPF, CHPF, CAUF and CSCF EVAPORATOR COILS

ENHANCED PERFORMANCE

At Goodman, we believe in American dependability. Units are designed, engineered and assembled in the U.S.A.

Goodman is one of the biggest names in home heating, cooling and energy-efficient home comfort. That's because Goodman lives up to its name in a big way, with time-tested energy-efficient technology, highly-durable materials and spot-on manufacturing. So, no matter where you live or whether your home is small or large, Goodman probably has a solution to help keep your home comfortable.

Using Goodman is a breeze. Love is in the air.

The best indoor comfort system is the kind you don't have to think or worry about. It comes on the moment you need it and then runs quietly and efficiently year after year. **Goodman** air handlers and coils have features designed to provide outstanding performance. We use advanced techniques and materials so you know the cozy, even temperature you feel in every corner of your home is an energy-efficient trend you'll love for many years.

Home comfort that won't blow your budget.

Our complete line of air handlers and coils are priced reasonably and affordably from your local independent dealer. And that's only the beginning. We want you to smile every time you open your utility bill, so we design into our units proven efficient technology.

Taking pride in our company heritage.

Goodman brand heating and cooling systems are designed to provide refreshingly affordable and energy-efficient indoor comfort solutions using advanced technology. But the company ultimately adheres to some old-fashioned values, too. Goodman believes in the integrity of the American worker. That's why Goodman brand heating and cooling systems are designed, engineered and assembled in the United States.

Experience reliable indoor comfort for everyone in your home year after year after year.

A LOT GOES INTO EVERY **GOODMAN** BRAND CAPT, CAPF, CAUF, CHPF, CAUF and CSCF ALL-ALUMINUM EVAPORATOR COIL

The art of precision

Aluminum Tube and Aluminum Fin Coil Construction – Provides time-tested and proven heat transfer efficiency designed to resist potential corrosion.

Grooved Aluminum Tubing – Offers increased surface area for efficient heat transfer performance by the unit's refrigerant.

Goodman evaporator coils provide you with reliable, energy-efficient and affordable indoor comfort.

Initial Pressure-Leak Test – To ensure high levels of product quality, coils are pressure tested during assembly. It's just the first step in three leak test processes to help ensure a high quality product.

Secondary Pressure-Leak Test – Before the coils leave the assembly line, a secondary pressure-leak test is conducted with hand-held devices to check brazed joints.

'Hound-Dog' Vacuum Test - Coils undergo automated testing for leak 'sniffing' during the 'hound-dog' vacuum test.
