16G SERIES - 1 HP

APPLICATIONS

Offered in 115V and 230V options, the 16G Series is designed as a new or replacement grinder pump for the toughest residential and light commercial wastewater applications. Ideal for use as a drop-in replacement for any effluent or sewage pump struggling with clogs and binding.

FEATURES

1. Heavy-duty 1 hp Class F motor provides optimal power to prevent flushables and other debris from causing clogs and downtime.
2. Superior grinding capability with proven results based on the patented cutting mechanism renowned in Franklin Electric's 2 hp grinder pump. 27 stationary blades and eight rotating blades produce 3450 rpm and 745,200 cuts per minute.
3. 1-1/4" discharge and 2" NPT adapter discharge preassembled onto the pump.
4. Silicon carbide mechanical seal provides up to six times longer seal life with lower thermal expansion and higher abrasion resistance when compared to carbon ceramic seals.
5. Easily replaceable, 20' power cord is sealed at the connection point for unit protection against water.
6. Non-skid adjustable legs for stability.
7. Vertical and tethered float switch available on 115V and 230V models.

TYPICAL SINGLE FAMILY DWELLING SEWAGE PUMP CHART

Note: The data contained herein is for reference only. Proper sizing and selection of sewage pumps requires consideration of many factors. Always consult applicable local codes before installing any equipment. This chart is based on a residential application with not more than 34 fixture units (values assigned to each plumbing fixture). The TDH (Total Dynamic Head) of the system is calculated based on total vertical lift, horizontal length of discharge piping, and the friction losses for 2" diameter plastic pipe (3" diameter plastic pipe where the 16S pump is shown). Calculations based on 25 gpm.
