PRO-FLEX™ ABOUT US

In 2014, Pro-Flex was acquired by the ownership of Sioux Chief Manufacturing. Based in Hillsboro, Indiana, Pro-Flex offers a corrugated stainless steel tubing (CSST) system for natural or propane gas that offers a flexible, labor-saving alternative to black steel pipe installations. Rigid steel installations require numerous fittings and cutting and threading of pipe which is extremely labor intensive. The fitting system and flexible quality of CSST eliminates the costs inherent with black steel pipe – labor savings alone can be up to 75%. Pro-Flex has been providing their tubing, fittings, and accessories to the plumbing, heating, propane & natural gas markets for more than 20 years.

THE PRO-FLEX™ ADVANTAGE

LEAK-FREE CONNECTION... FIRST TIME, EVERY TIME

The Pro-Flex™ fitting system is the most forgiving, cost-effective, leak-eliminating system on the market today. Contact your local representative or give us a call for more information.

INSTALLATION AS EASY AS 1, 2, 3...

1. Strip and remove plastic coating in the fourth valley and slide on nut.

2. Place Retainer and Slide Ring in the fourth valley. Place o-ring in third valley. Ensure gasket is in fitting.

3. Hand tighten nut followed by additional 1/4 to 1/2 turn with crescent wrench.
