dahl, Ask for it by name®

The premium quality of every **dahl** valve and pipe hanging product is a promise we make, and a promise we keep, to all of our customers.

Quality products and quality service are our only priority.

100% North American

In the plumbing industry, sourcing of raw materials, parts, packaging and/or finished goods offshore is commonplace. **dahl** products are designed, engineered and manufactured in our Canadian facilities. We source our raw materials and components from the United States or Canada. This gives us control over product quality and on-time delivery to customers.

A Lifetime Warranty Backed by Superior Customer Service

In order to warranty our products for a lifetime, quality is inherent. **dahl** valves are guaranteed for as long as you own the property in which they were installed.

dahl's warranty is the industry's best, and clearly proves the quality of the products. It is the result of over 50 years of manufacturing experience.

**Lifetime
Warranty**

The 1/4 Turn dahl Mini-Ball™ Valve

dahl pioneered the 1/4-turn **mini-ball™** valve for North American supply stops in 1984.

dahl **mini-ball™** valves are available in thousands of configurations. Patented modular design allows for production of a valve for multiple plumbing and hydronic applications.

Design attributes of 1/4-turn mini-ball™ valves

Non-rising stem - The non-traveling stem prevents mineral deposits and other fouling from damaging the seal and causing leaks.

Sealing feature - PTFE seals are used to ensure smooth operation and prevent fouling for their lifetime.

Better materials are the first step to better quality

dahl sets stringent standards for our suppliers. We thoroughly test any material prior to considering purchase. **dahl** never compromises on quality standards. All raw materials utilized are sourced from the United States or Canada.

Brass - Compared to "offshore" brass, American brass has fewer impurities and a preferable microstructure. This results in far superior corrosion resistance in aggressive water conditions.

PTFE - The quality of American PTFE rod dahl purchases for precision-machined ball valve seals is unmatched, and critical to long product life. **dahl mini-ball™** valves have been life cycle tested to over 700,000 cycles without failure.

O-Rings - **dahl** purchases American O-rings made from the highest quality compounds. O-rings used by dahl are free from common defects such as geometric deficiencies that cause leaks and rapid deterioration caused by inferior resistance to aggressive elements in the water.

Our products exceed CSA and IAPMO requirements. **dahl's** position as the industry leader is demonstrated by the immediate responsiveness of customer service representatives. Your call will be answered within 15 seconds from the time you are connected to the phone system. We also strive to respond to e-mails within 1 business day.

LIFETIME LIMITED WARRANTY

dahl Valve Limited ("dahl") warrants to the purchaser from dahl (the "Purchaser") and the end user (the "End-User") that its Mini-Ball™ Valve, Fitting, and Globe Style Valve products (the "Products") sold after Sept. 1, 2013, shall be free from defect in materials and workmanship, under normal use and service, for the lifetime of the installation commencing on the installation date of the Product, and that the Product will conform to the specifications for the Product which are in effect at the time that the Product is manufactured. The product warranty is transferable upon sale of the property.

A Purchaser or End-User (the "Claimant") submitting a claim under this Warranty must do so in writing to dahl at 2600 South Sheridan Way, Mississauga, Ontario, L5J 2M4 or at such other address as may be advised by dahl from time to time via its web site or by other technology, and if required by dahl, obtain dahl's return Product authorization and return the Product to dahl or its authorized agent at the Claimant's expense for inspection. It shall be the responsibility of the Claimant to prove that the claim and Product have been received by dahl. **Upon confirmation that this Limited Warranty (the "Warranty") is applicable by dahl, dahl shall: (1) replace the Product with one of like quality, grade and function; (2) pay up to \$50 in labor charges for the de-installation or re-installation of a replacement Product; and (3) pay mailing costs incurred to send a replacement Product to the Claimant.**

THIS SECTION IS NOT APPLICABLE TO PERSONAL/RESIDENTIAL/CONSUMER PURCHASES:

dahl makes no other representation or warranty as to the merchantability, quality or fitness of the Product for any purpose and, to the extent permitted by applicable law specifically disclaims all representations and warranties of every kind and nature whatsoever, whether express, implied, statutory or otherwise, in relation to the Product. dahl's liability with respect to any claim by a Claimant will be limited solely to replace the Product as set forth in this Warranty.

This Warranty does not apply to any defect in the Product or damages incurred in connection with the Product if such defect or damages involve, relate to or are caused in whole or in part by any of the following:

1. use for any purpose other than water/glycol based plumbing and heating systems;
2. normal wear and tear;
3. 'Specialty Finishes' as the same are identified in dahl's hard copy or electronic catalogue as of the date of manufacture of the Product;
4. any product or component of a Product that is not manufactured by dahl;
5. the use of the Product for purposes other than those intended by dahl or permitted in accordance with applicable law or regulation;
6. Products which are not installed, used or serviced in accordance with dahl's specifications or any applicable law or regulation;
7. abuse, mishandling, tampering, improper installation, improper operation or modification of the Product, neglect or accident;

8. any force majeure, fire, casualty, flood, earthquake, war, epidemic, riot, insurrection, act of terrorism, vandalism, or contamination, including, without limitation, damages incurred in connection with any substance other than water/glycol being introduced into the system of which the Product forms a part, freezing, corrosion or adverse water or external environmental conditions, or any other cause beyond the reasonable control of dahl or
9. Claimant's failure to take reasonable steps to maintain and inspect the Product or failure to take appropriate standby procedures in place in relation thereto.

THIS SECTION IS NOT APPLICABLE TO PERSONAL/RESIDENTIAL/CONSUMER PURCHASES:

IN NO EVENT SHALL dahl BE LIABLE OR RESPONSIBLE TO ANY PARTY (WHETHER IN CONTRACT, TORT OR OTHERWISE) FOR ANY DEATH OR INJURY (WHETHER PHYSICAL OR MENTAL) OR FOR ANY INDIRECT, SPECIAL, INCIDENTAL, CONSEQUENTIAL, CONTINGENT, LIQUIDATED, PUNITIVE OR EXEMPLARY LOSS OR CLAIM, INCLUDING, WITHOUT LIMITATION, LOSS OF BUSINESS OR PROFIT, WATER DAMAGE OR MOLD INTRUSION, ARISING FROM OR IN CONNECTION WITH THE PRODUCT, OR ANY DELAY IN REPLACING THE PRODUCT, REGARDLESS OF WHETHER SUCH LOSS OR DAMAGE IS CAUSED BY ANY ACT OR OMISSION ON THE PART OF dahl WHETHER OR NOT THE SAME CONSTITUTES NEGLIGENCE, GROSS NEGLIGENCE OR FUNDAMENTAL BREACH, OR ANY ACTUAL OR ALLEGED MANUFACTURING DEFECTS IN THE PRODUCT, EVEN IF DAHL HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES AND/OR IF THE LIKELIHOOD OF SUCH DAMAGES WAS FORESEEABLE.

THIS SECTION IS NOT APPLICABLE TO PERSONAL/RESIDENTIAL/CONSUMER PURCHASES:

OUTSIDE ONTARIO. This Warranty shall be interpreted in accordance with the laws applicable in Ontario, Canada (other than Ontario principles of conflicts of law) and all disputes in connection with this Warranty shall be resolved by the courts of the Province of Ontario which shall have exclusive jurisdiction.

This Warranty constitutes the entire agreement between the parties pertaining to the warranty for the Product; cannot be modified or waived without dahl's written agreement. The application of the United Nations Convention on Contracts for the International Sale of Goods does not apply to this Warranty and is hereby expressly excluded. If any provision of this Warranty or any part of any provision of this Warranty is held to be invalid, illegal or unenforceable by a court of competent jurisdiction, such provision or part shall not affect the validity, legality or enforceability of any other provision of this Warranty or the balance of any provision of this Warranty absent such part and such invalid, illegal or unenforceable provision or part shall be deemed to be severed from this Warranty and this Warranty shall be construed and enforced as if such invalid, illegal or unenforceable provision or part had never been inserted in this Warranty. Claimant's acceptance of the Product shall without limitation constitute acceptance of all terms and conditions stated in this Warranty.

OPERATION

Choose a variety of methods for operating the valve, from different colors of handles to Loose Key with Screwdriver Slot. Available on all **mini-ball™** Valves

	Description	Modify Part Number	Part Number Example
	Red Handle	3rd Digit of Valve # - 4	624-08-04
	Blue Handle	3rd Digit of Valve # - 5	625-08-04
	Purple Handle	3rd Digit of Valve # - 7	617-33-31
	Loose Key with Screwdriver Slot and Lockshield Key sold separately	Replace 3rd Digit of Valve # with "6SS"	616SS-33-31
	Loose/Lockshield Key		9941

DRAIN FEATURE

Create a stop & drain valve. Available on both straight and angle pattern models. Add "D" to the Inlet or Outlet in the part number as shown below:

	Description	Modify Part Number	Part Number Example
	Drain Provision for 1/2" (Use 3/4" pricing for Large Bore valves)	Add to Part # - D	521-13-13D
	Drain Provision for 3/4" (or 1/2" Large Bore)	Add to Part # - D	521-14D-PX5

Optional Features for mini-ball™ Valves

POLYBAG PACKAGING

Any valve can be ordered in a polybag with the dahl part number and UPC code printed on the bag. Installation instructions are also included on every bag.

	Description	Modify Part Number	Part Number Example
	Plastic Bagging with UPC bar code	Add to Part # - BAG	611-33-31 <u>BAG</u>

CAP & CHAIN

Valves with hose outlet can be ordered with a cap & chain attached to the handle.

	Description	Modify Part Number	Part Number Example
	Cap & Chain	Add DH beside operation type and CC beside Hose connection in the part number	621 <u>DH</u> -01-04 <u>CC</u>

TAG HOLE IN HANDLE

The 3/16" tag hole enables labelling of the valves in a basement or mechanical room, making it simple for future identification without having to trace lines or reference original mechanical blueprints.

	Description	Modify Part Number	Part Number Example
	Drilled Handle (3/16" hole drilled in handle for tags)	Add "DH"	521 <u>DH</u> -PX3-PX3

Optional Features for mini-ball™ Valves

VALVES WITHOUT COMPRESSION NUTS

Any valve with a compression outlet for Copper pipe can be ordered without the compression nut & sleeve (ferrule). This reduces cost for the installer who uses braided connectors, or the dahl Universal Tee.

	Valve Finish	End #	Description	Modified End #	Part Number Example
	Plated	30	1/4 OD Comp	30LNS	611-PX3-30LNS
	Brass	30	1/4 OD Comp	30LNS	621-PX3-30LNS
	Plated	31	3/8 OD Comp	31LNS	511-33-31LNS
	Brass	31	3/8 OD Comp	31LNS	521-33-31LNS
	Plated	32	1/2 OD Comp	32LNS	611-33-32LNS
	Brass	32	1/2 OD Comp	32LNS	621-33-32LNS
	Plated	33	5/8 OD Comp	33LNS	511-13-33 <u>LNS</u>
	Brass	33	5/8 OD Comp	33LNS	521-13-33LNS

SHANK NUTS

	Description	Modify Part Number	Part Number Example
	Shank Nut for outlet box valves	Add "NUT"	621-PX3L-31 <u>NUT</u>

Optional Features for mini-ball™ Valves

BRANCH TAPPING - FOR HEATING APPLICATIONS ONLY

dahl's Branch Tapping option is available on all **mini-ball™** Valves and **mini-ball™** Balancing Valves.

This ingenious feature allows specification of a 1/8" or 1/4" FIP tapping on the valve for a variety of custom functions, including venting and/or draining.

dahl also supplies **mini-ball™** drain valves with hose outlet (shown at left below), for installation into Branch Tapping.

Here are a few of the accessories that dahl customers have installed using the Branch Tapping:

Sold by others:

- Pete's Plugs
- Gauges
- Schrader Valves
- Coin vents
- Fittings for capillary lines

Available from dahl

- Petcocks/Guage Cocks
- Drain Valves

BT1 = 1/8 F Branch Tapping; BT2 = 1/4F Branch Tapping

Modify Part Number	Valve Size	Part Number Example
Add "BT1" or "BT2" beside inlet or outlet in the part number	1/2"	121-13-PX3 <u>BT1</u>
Add "BT1" or "BT2" beside inlet or outlet in the part number	3/4"	121-14-14 <u>BT2</u>

Call dahlcustomer service to create the exact specification for your Branch Tapping product.

THE DAHL **QUICK-GRIP™** CONNECTION SIMPLY PUSH IT ON!

- For 1/2" Copper - No compression, no soldering – great for wet pipe.
- For 1/2" PEX - No crimping, just use the supplied tube insert
- For 1/2" CPVC - No gluing

SIMPLE TO INSTALL – PUSH IT ON!

Cut pipe, deburr, clean and push it on!

RELIABLE

Withstood pipe burst pressure when tested.

EASY REMOVAL AND RE-USE

NO DISCONNECTED TOOL REQUIRED.

Dahl originated the hand-operated Release Sleeve.
Follow installation instructions for removal.

REDUCES YOUR INVENTORY!

One connection for three different pipe types.

CERTIFIED & CODE COMPLIANT

CSA and IAPMO approved to ASSE 1061, NSF/ANSI 372
(formerly NSF/ANSI 61-6)

ANG = Angle, STR = Straight, PL = Plated, RB = Rough Brass

Supply Kits

Faucet / Lavatory

- Various kits are available with different supply stops to suit the specific pipe type

- Braided Hose Kits for "re-fit" jobs may be ordered less ALL valve inlet compression nuts & sleeves, and less escutcheons
- This option applies only to kits that contain valves with compression inlets, typically 5/8 OD Comp
- To specify this option, add suffix "LNE" to the part numbers - For example: E33-2278-LNE

mini-ball™ valves

No Solder Replacement Valves

NO SOLDERING REQUIRED!

- Better flow than old globe valves
- Replace old valves quickly
- Safe when soldering is not
- Available for 1/2" or 3/4" copper pipe

3 EASY STEPS:

Installs easily even on wet pipe

COMPARE THE FLOW:

Cv = Flow in USGPM
with 1 PSI
pressure drop

Globe Valve

No Solder Valve

1/2" - 15 USGPM	Cv = 2.3	Cv = 7.5
3/4" - 30 USGPM	Cv = 4.0	Cv = 6.5

Hose and Boiler Drain - Lead-Free

For Use with:

- Garden Hose
- Washing Machine
- Boiler Drain

Available with:

- Tamper-resistant Loose-Key operation

- With Drip Cap or Cap & Chain

- Male and Female hose connections

- 1/2 Fem. Solder or 1/2 MIP connection

OPTIONS

LARGE BORE

LB

Available on selected models
Add "LB" after the Operation
For Example: 521**LB**-33-33

DRAIN

D

Add "D" to Inlet or Outlet to
indicate position.
For Example:
521-13-13**D** or 521-13**D**-13

BALANCING

(For heating applications only)
Add "BAL" after handle option
For Example:
121**BAL**-13-13

WATER HAMMER ARRESTER

14WHA

Add "14WHA"
after the Outlet Connection
For Example: 511-33-31-**14WHA**

CAP & CHAIN

DH CC

For Hose Valves
Add "DH" after Operation type
and "CC" after the
Hose Connection
For Example: 621**DH**-01-04**CC**

SHANK NUT

NUT

For Outlet Box Valves
Add "NUT"
For Example: 621-PX3L-04**NUT**

BRANCH TAPPING

For custom functions including:
-Venting-Filling-Draining-Gauges
1/8F Branch Tapping Add
"BT1" beside inlet or outlet
1/4F Branch Tapping Add
"BT2" beside inlet or outlet
For Example: 511-51-51**BT1**

Contact us to specify the location of your Branch Tapping

BAGGED

BAG

In Poly-bag with UPC and
instructions. Add "BAG" to
complete part number
For Example: 511-13-31-**BAG**

Balancing

mini-ball™ valves

The Perfect Balancing Act for All Types of Radiant Floor Systems!

- U.S. Patent #5735307
- Preferred by quality OEMs
- Compact design
- Separate shut-off & balancing
- Remove safety cap and set memory spindle according to chart
- Simple to balance by loop length
- Memory Spindle adjust average 10% of full flow per turn
- Available for Copper, Iron, PEX, PEX-AL-PEX, and CPVC
- Working Pressure: MAX 250 PSI to 250F depending on pipe materials

#121BAL 13 PX3 1/2 Fem. Solder x 1/2 Crimpex

For balancing of manifolds, open the memory spindle fully for the longest loop and balance the other loops by setting their memory spindles according to their loop lengths relative to the longest loop.

EXAMPLE: four loop manifold

Longest loop	250'	set memory spindle 250/250 x 10 = 10 turns open
Loop #2 =	200'	set memory spindle 200/250 x 10 = 8 turns open
Loop #3 =	125'	set memory spindle 125/250 x 10 = 5 turns open
Loop #4 =	100'	set memory spindle 100/250 x 10 = 4 turns open

Water Hammer Arrester Valves

Water Hammer Arrester Products THE SIMPLE WAY TO SILENCE WATER HAMMER

DID YOU KNOW?

Water Hammer may result in:

- Noisy pipe banging and rattling
- Fitting failures
- Burst connectors
- Burst washing machine hoses, the primary cause of floods in homes
- Appliance solenoid failures, and these costly repairs are not covered by the appliance warranty

While water hammer is often associated with banging, rattling and thumping, water hammer doesn't always make these noises. Water hammer happens when the flow of water in a pipe is suddenly stopped by a quick closing valve.

Quick closing valves cause a pressure spike and reverberation inside the pipe until the spike dissipates. While metallic pipes are more likely to make an audible noise, water hammer also occurs in PEX and other plastic pipe systems. Usually, an air pocket in the system will absorb the pressure spike, but if no pocket of air is present, fixtures and appliances in the plumbing system may be damaged by the pressure spikes.

Constant solenoid on/off cycles during each load can cause:

- Pressure spikes resulting in water hammer: rattling, noisy pipes
- Extensive damage including solenoid failure, water line bursts, & other system failures

Quick closing valves are found in:

- Washing machines
- Dishwashers
- Icemakers
- Single lever faucets
- Touchless automatic faucets
- Toilets

Air chambers or capped stand-pipes are typically incorporated into plumbing systems to provide the air pocket necessary to prevent water hammer. However, in these devices, there is nothing separating the air and water. This allows air to permeate into the water within weeks, resulting in waterlogged and completely ineffective water hammer protection.

Notice the difference in water level of the Static Water Pressure on the left, in comparison to After the Shut-off.

Water Hammer Arrester Valves

Dahl 1/4 Turn Retrofit Supply Stop with Integral Water Hammer Arrester

◀ #511-41-31-14WHA

3/8 Fem. OD Comp x 3/8 OD Comp x Water Hammer Arrester

Water Hammer Arresters differ from air chambers in that they permanently separate air from the water. When a Dahl water hammer arrester product is used, the pressure spike pushes a double O-ring sealed piston against a pressurized cushion of air, absorbing the pressure spike and preventing water hammer.

Dahl Water Hammer Arresters are available in the "AA" Size which are recommended for point of use residential applications. For best results, they should be installed as close as possible to the end point device, less than 2m (6 ft.). The O-ring sealed piston allows for installation at any angle, without loss of the pressurized air. These arresters have been tested to 500,000 cycles without failure, and are guaranteed to control water hammer for the lifetime of the water system.

Dahl Water Hammer Arresters are certified by the American Society of Sanitary Engineering to the ANSI/ASSE 1010 standard, and are recommended by the Uniform Plumbing Code and International Plumbing Code. As new high efficiency appliances become more widespread, so is the prevalence of water hammer. Several local building codes are now mandating the use of engineered water hammer arresters.

#521-04-04F-14WHA
Male Hose x Female Swivel Hose
x Water Hammer Arrester

Dahl offers more water hammer arresters integrated with valves than any other manufacturer.

This benefits installers by allowing a compact, professional installation that takes less installation time.

Constant solenoid on/off cycles still occur during each load, but:

- Piston compresses air, cushioning water on quick shut-off
- Pipes are quiet, no water hammer
- No potential solenoid and water line failures

Dahl Water Hammer Arrester products include: *Supply stops, Dual Shut-off Valves, In-line Stops and Isolation, Outlet Box Valves, Supply Kits, Tee & Valve Kits and even Retrofit models that simply piggy-back in between existing valves/fittings and risers/hoses.*

Globe Stops

Partition Stops

ELIMINATES THE NEED FOR ACCESS BOXES

#2310-442008

No need to flush cut the tube, the extra deep stainless steel partition plate covers the protruding portion. No tube removal and no marking of the finished wall when cutting tube!

#2330-442008

#9921 Partition Plate

See **Repair Parts and Accessories** for Keys and Plates.

MINIMUM ROUGHING-IN DIMENSIONS

VALVE SIZE	MIN "M"
1/2"	2-7/8"
3/4"	3-1/8"

Same for angle & straight patterns

#9921 Partition Plate Sold Separately

Allow minimum 3" between hot and cold as partition plate has a diameter of 2-1/2"

mini-ball™ VALVES

STRAIGHT PATTERN

ANGLE PATTERN

WORKING PRESSURE

- Up to 250 PSI/250°F depending on pipe material and end connections

HEAT RESISTANT

- Do not disassemble; solder in open position

CORROSION RESISTANT

- Highly resistant to dezincification and stress corrosion cracking
- Meets requirements of NSF 14 (ISO 6509 and ASTM B858)

LISTINGS, where required to

- CSA
- UPC (IAPMO)
- NSF/ANSI 372 (Formerly NSF/ANSI 61-G)

Meets CSA, IAPMO and ASME Flow Requirements

APPROXIMATE Cv

(depending on pipe connections)

- 1/2 = 3.0
- 3/4 = 6.0

MATERIALS

- Brass Body
- Lead-Free compliant alloy
- Plated or Coated Zinc Handle
- PTFE, Fluorocarbon (FKM) and EPDM Seals

ADVANTAGES

- Exceeds Lead-Free* Compliance requirements.
- Quick 1/4 Turn on or off
- No adapters needed - thousands of models available
- Two stem O-Rings for safety
- Self-lubricating PTFE seals
- Compact design
- Drain/Waste models available
- Tamper Resistant operation available
- Multiple Applications for Plumbing and Heating
- dahl Quality - Each valve is tested before leaving our plant
- Glycol compatible (≤50%)

*Lead-free means the weighted average lead content is less than 0.25% on wetted surface areas.

ANG = Angle, STR = Straight, PL = Plated, RB = Rough Brass

Technical Information

GLOBE STOPS

#E2312-44

#E2311-44

APPLICATION

- Potable Water Plumbing Systems

WORKING PRESSURES

- 200 PSI/180°F

LISTINGS

- CSA
- Meets full flow requirements

MATERIALS

- Cast brass body, Lead-Free compliant alloy
- Smooth die cast Zinc Handle, Powder coated
- Spring-loaded self-adjusting EPDM packing system
- Buna nitrile disc

GLOBE RADIATOR & BALANCING VALVES

REGULAR PATTERN

#11021-4112

HEAVY PATTERN

#11042-4112

APPLICATION

- Forced Water Heating & Cooling Systems

WORKING PRESSURE - REGULAR PATTERN

- Hot Water 200 PSI/250°F

WORKING PRESSURE - HEAVY PATTERN

- 250 PSI/250°F on forced hot water systems (and low pressure steam systems up to 15 PSI)
- not suitable for one-pipe systems

MATERIALS

- Cast brass body
- Smooth heat resistant plastic handle; molded in colour handle
- Spring-loaded self-adjusting EPDM packing system
- Buna nitrile disc (Regular Pattern)
- Glass-Filled PTFE disc (Heavy Pattern)

ADVANTAGES

- Maintenance Free - Spring-loaded self-adjusting packing system
- Field Proven - Specified and installed across Canada since the 1960's
- Dahl Quality - Each valve is tested before leaving our plant
- Heat Resistant - Do not disassemble; solder in open position

ANG = Angle, STR = Straight, CP = Chrome Plated, RB = Rough Brass

8.0	R - Recommended Velocity Limit Residential C - Recommended Velocity Limit Commercial				1.7	5.3
9.0					2.1	6.0 ^C
10.0					2.5	6.6

FLOW & PRESSURE DROP CALCULATIONS

The Cv value tells how many USGPM of water will flow through a valve with a pressure drop of 1 psi (= 2.31 feet water column).

If the Cv of a valve is 6.0. it means that we can measure a pressure drop of 2.31 feet of water across the valve when the flow is 6 USGPM.

The basic flow formula tells us that the pressure drop (Δp) varies with the square of the flow (F):

$$\frac{\Delta p_1}{\Delta p_2} = \left(\frac{F_1}{F_2} \right)^2 \quad \text{Hence: } \Delta p_2 = \left(\frac{F_2}{F_1} \right)^2 \Delta p_1 \quad \text{and} \quad F_2 = \sqrt{\frac{\Delta p_2}{\Delta p_1}} F_1$$

EXAMPLE: What is the pressure drop of a valve, Cv 6.0 with 9 USGPM?

$$\text{Solution: } \Delta p_2 = \left(\frac{F_2}{F_1} \right)^2 \Delta p_1 = \left(\frac{9}{6} \right)^2 2.31 \text{ Ft.} = 5.2 \text{ Ft.}$$

ANG = Angle, STR = Straight, PL = Plated, RB = Rough Brass

METRIC CONVERSION OF IMPERIAL UNITS IN THIS CATALOGUE

200 PSI/250w	1379.0 kPa/121°C
150 PSI/300w	1034.2 kPa/148.9°C
250 PSI/250°F	1723.7 kPa/121°C

1	25 mm
1-1/4	32 mm
1-1/2	38 mm
2	50mm

SHOULD DIELECTRIC FITTINGS BE USED WITH DAHL VALVES?

Millions of Dahl castings have been installed in plumbing and heating systems in Canada during the past fifty years between steel riser connections and copper terminal circuitry.

Very few of these have been isolated with dielectric fittings, and we have not yet had a single report of galvanic corrosion problems. The casting alloy has a copper content between 80 and 85%, and the brass union or fittings have approximately 60%. These alloys are between the steel and the pure copper on the galvanic scale. The farther apart on the galvanic scale, the greater the risk of galvanic corrosion. Since these brass alloys are closer to steel than to copper, the risk of such corrosion is reduced.

Any survey of major installations in Ontario over the past 20 years would indicate that most of them have been made without dielectric fittings. This is because of the performance record of brass and also because dielectric unions are expensive and result in more joints, and hence, potential leaks in the system.
