### WD06 Wall installation

The Dyson Airblade Wash+Dry hand dryer is designed so that the motor unit is located behind the stud wall within a metal enclosure which is supplied with the Dyson Airblade Wash+Dry hand dryer (Fig.1). The vertical wall studs must be constructed so as to allow the metal enclosure to be fitted between them (Fig.2). One of the horizontal wall studs must be fitted a) so it holds the main weight of the metal duct and the unit, and b) so it is in the correct position for the tap stem.

For complete instructions, please refer to the printed installation guide supplied with the machine.  
It's also available online at [www.dyson.co.uk/docs](http://www.dyson.co.uk/docs)

TECHNICAL SPECIFICATION

Electrical

Input voltage/Frequency: 200-240V 50-60Hz
Motor specification: 1000W digital brushless motor
Operating temperature range: 0°-40°C, 32°– 104°F
Heater type: None
Standby power consumption: Less than 0.5 W

Construction

Tap construction: Stainless steel (brushed)
Under counter motor assembly construction: Moulded ABS (main unit)
Exterior screw type: Torx T15
Water ingress protection to IP35

Filter

HEPA filter (glass fibre and fleece prelayer)
Captures 99.95% of particles as small as 0.1 microns from the washroom air <sup>1</sup>

Operation

Touch-free infra-red activation
Hand dry time measurement: 14 seconds
Operation lock-out period: 30 seconds
Airspeed at apertures: 341 mph/549 km/h
Maximum altitude: 2,000 metres / 6,562 ft.

Water operation

Water flow rate: 1.9 l/min normal fitted aerator. 4 l/min with low flow aerator supplied with product.
Water temperature control: Thermostatic mixer recommended (not supplied)
Water pressure required: 1-8 bar
Equipped with automatic duty flush – every 24 hours for 60 seconds after the last use.

Logistics

Net weight: WD04 4.26 kg; WD05 4.54 kg; WD06 9.51 kg
Packaged weight: WD04 6.76 kg; WD05 7.38 kg; WD06 13.65 kg
Packaged dimensions: WD04 H303 × W284 × D291 mm WD05 H434 × W275 × D288 mm; WD06 H610 × W375 × D302 mm

Basin specification

The Dyson Airblade Wash+Dry hand dryer is compatible with most basin types. Ensure plugs are not installed in the basins and avoid inserts with embedded plugs (e.g. ones that swivel or elevate).
Using a specially designed test method, Dyson engineers evaluated the user experience of a wide range of basin types when used with the Dyson Airblade Wash+Dry hand dryer. For further details on our recommended basins, please see the guide on our website <a href="https://dyson.co.uk/docs">dyson.co.uk/docs</a>
We recommend avoiding basins with the following geometric characteristics; Flat bases immediately surrounding the drain hole. (nominally within a 60 mm radius). Sloping back and front wall transitions in relation to the base of the basin. See our pre-installation guide for further details: <a href="https://dyson.co.uk/docs">dyson.co.uk/docs</a>

Basin dimensions: All basin measurements are internal unless stated otherwise. Minimum width of basin: 350 mm, Front to back – Minimum: 300 mm Minimum depth of basin: 100 mm Maximum depth of basin for WD05 only: 200 mm (External measurement of vessel basin)
Basin materials: Basins with highly polished surfaces should be avoided, e.g. reflective chrome. Porcelain or brushed metal is ideal. When multiple taps are installed side-by-side, tap centres should be a minimum of 580 mm apart.

Standard warranty

5 year parts, 5 year labour.
------------------------------

Product range

<sup>1</sup>HEPA filter tested to EN1822-5, by an independent testing laboratory, under prescribed test conditions.
