Step 5

⚠ Ensure wall profiles are plumb.
 Adjust enclosure to be square and level.
 Wheels should be adjusted to square the doors and ensure smooth running.

Step 6

⚠ Adjust the sliding doors using the screws located on the bottom of top roller assemblies. Adjust rollers so that the sliding doors are parallel to the fixed panels and parallel to each other.
 Note: Do not over tighten top rollers as this will cause the bottom rollers to jam and/or break.
