

CONSERVATIONIST®

FULLY AUTOMATIC CONTROLS WITH SAFETY SHUTOFF

- Accurate, dependable control system requires no electric connections. Fixed automatic gas shutoff device for added safety.
- Temperature adjustable up to 181°F

GLASSLINED TANK

- Maximizes tank life.

HEAVY GAUGE STEEL JACKET

- Finished with baked enamel over bonderized undercoat.

FOAM INSULATION

- Saves fuel, helps reduce standby heat loss.

EASY-TO-INSTALL

- Completely factory-assembled. Only gas, water and vent connections need be made. All connections are located in front and top of heaters for ease of installation and service.

DRAFT DIVERTER

- Low profile diverter furnished as standard equipment.

MAXIMUM WORKING PRESSURE

- 150 psi.

MAXIMUM GAS INLET PRESSURE

- 14" W.C.

HANDHOLE CLEANOUT

- Allows easy tank cleaning.

BUILT-IN GAS FILTER AND INTEGRAL DIRT LEG (PROPANE ONLY)

CATHODIC PROTECTION

- Magnesium anode protects the tank against corrosion.

INTEGRAL AUTOMATIC GAS SHUTOFF SYSTEM PREVENTS EXCESSIVE WATER TEMPERATURE

STANDARDS AND CERTIFICATIONS

- All models meet the thermal efficiency and standby loss requirements of NRCan and Current Edition ASHRAE/IESNA 90.1.
- CSA certified and ASME rated T&P relief valve.
- Not recommended for sanitation rinse.

3-YEAR LIMITED TANK / 1-YEAR LIMITED PARTS WARRANTY

- For complete warranty information, consult written warranty or go to hotwater.com.

SPECIFICATION

Water heater(s) shall be Model _____ as manufactured by A. O. Smith or an approved equal. Water heater(s) shall be of glasslined design, and gas-fired, equipped to burn _____ gas and design certified by CSA and shall be approved by the National Sanitation Foundation (with optional leg kit). Heaters must meet all applicable energy codes. Heaters shall have an input rating of _____ BTU/H and a recovery capacity of _____ GPH at a temperature rise of 100°F with a storage capacity of _____ gallons. Heater shall be equipped with a 2-3/4" x 3-3/4" boiler-type handhole cleanout and shall have a working pressure of 150 psi. Heater(s) shall be provided with an automatic gas shutoff device and safety shutoff in event pilot flame is extinguished; a gas pressure regulator set for the type of gas supplied; an approved draft diverter, and extruded anode rod rigidly supported for cathodic protection. A CSA Certified and ASME Rated T&P Relief Valve shall be furnished and installed by the manufacturer. The tank shall be foam insulated. The outer jacket shall have a baked enamel finish over a bonderized undercoating. All internal surfaces of the heater(s) exposed to water shall be glasslined with an alkaline borosilicate composition that has been fused-to-steel by firing at a temperature range of 1400° to 1600°F. Heater tank shall have a three year limited warranty against corrosion and tank failure due to sediment build-up as outlined in the written warranty. Heater(s) shall be design certified by CSA for operation of the heater in a closed system where thermal expansion has not been compensated for with a properly sized expansion tank will void the warranty. Fully illustrated instruction manual and parts list to be included.

For Technical Information call 888-599-2837. A. O. Smith Enterprises Ltd. reserves the right to make product changes or improvements without prior notice.
