- Brand: Gerber

Features

- Easy Glide Selector Ring: Rotating ring switches smoothly between the four handheld spray settings
- Easy Clean Nozzles: Soft-touch nozzles resist buildup and wipe clean
- Number of handheld spray functions: 4

Description

Upgrade the daily routine in minutes with a dual shower head system that pairs a fixed shower head and a handheld in one convenient 2-in-1 design. No renovation is needed—simply install using the existing shower arm. A center push button operates the fixed head, the handheld or both at once, offering a versatile shower experience. The handheld features magnetic docking for smooth release and secure placement when not in use. The multi-setting handheld shower head offers modes: Cascade for a full rinse, Power Blade for precise cleaning, Cloud Mist for a soft soak and Jet Massage for soothing muscle relief. A smooth-gliding selector ring makes switching modes simple, while a metal ball joint adjusts the spray angle and a 72-inch tangle-free hose provides extended reach. Soft-touch nozzles resist buildup and wipe clean with ease.

Components

(For finish-specific component item numbers, please see the price book.)

- Sold Separately, Required: Existing shower arm (required and sold separately)

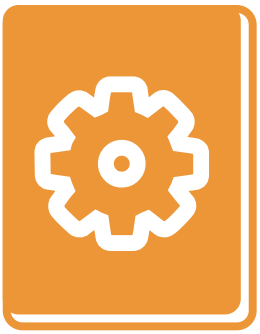

Certifications & Standards

- ADA Compliant: No
- WaterSense Certified: Yes
