

DS260

Descaling Pump Kit

Liberty Pumps®

A Family and Employee Owned Company

The DS260 is a descaling system designed to clean and restore efficiency to tankless water heaters. The system includes everything needed to circulate a flushing/descaling solution through tankless water heaters to eliminate lime scale and other contaminants which can build up on the walls of heat exchanger tubes over time.

DS260 Kit Includes

- 115V Submersible utility pump (Liberty Pumps Model 260-2)
- 5 Gallon plastic bucket with lid
- 6' Stainless steel braided return hose with swivel fittings
- 6' Stainless steel braided discharge hose with swivel fittings
- Strainer and filter for return line
- 32 fl. oz. biodegradable descaler (Descaler fluid replacement part #K002555)

Pump Features

- Thermoplastic body resists impact, stress, and corrosion
- Self-cleaning trash-type impeller
- 1/6 hp air-cooled PSC motor
- Mechanical shaft seal and lip seal
- Thermal overload protection
- Pumps down to 1/8"
- Completely submersible
- Removable bottom screen for easy cleaning
- 25' power cord

Pump Performance

TOTAL HEAD IN FEET	0	10	20	25
US GALLONS PER MINUTE	17	14	9	0
