Triple Sliding Door - Adjustment leaflet

Height Adjustment Guide

To ensure your sliding doors are aligned and the lock mechanism operates correctly, follow the steps below. All doors have an adjustment screw on each end of the door leaf

STEP 1: Accessing the Mechanism

Action: Locate the black plastic cover plate at the base of the door leaf

Removal: Remove the cover shown to access the adjustment screws

STEP 2: Adjusting the Door Height

Tool: Use a Pozi/Phillips screwdriver

Operation: Turning the screw will raise or lower the door height

Final Check: Adjust until the door is level and the lock mechanism operates correctly
