

GEO FENCED- TIME AND ATTENDANCE SOLUTION

Update Latitude and Longitude of your work locations, to create your virtual fences. Use the hassle free, Time and Attendance Solution on Mobile, to ensure your business rules are on place from day 1!

Very low TCO, as no external hardware or integration required. Plug and Play solution, which works independently as well as integrated with Workrig HCM. Application available on both Android and IOS.

NEW- GEO FENCED TIME AND ATTENDANCE ON MOBILE

MULTIPLE WORK LOCATION- GEO FENCING

Non-interfering, whereas still being guided by corporate business rules (ethical), Geo Fencing is one such solution that could be used for optimizing workforce time management. Further analysis of data collected, especially of multiple work location fences, that would allow organizations to measure time spent against work allocated.

EMBEDDED BUSINESS RULES & ANALYTICS INTEGRATED

All global policies embedded into the system, with exception handling on the app as well as on the Cloud system. Policies across multiple work locations can be configured and fenced. Time Tracking with integrated Work Management provides valuable inputs on people motivation and workforce reporting. Analytics for decision support across Time and Productivity (for Sales force, Field Staff) with integration with incentives management, motivates employees with additional incentives attached based on work time.

HOW DOES IT BENEFIT YOU?

- Employees can login to mobile within a Geo Fence only, therefore reducing misadventures.
- Multiple Geo Fences allow tracking of movement of people across all your work locations.
- Time Tracking with integrated Work Management provides valuable inputs on people motivation and workforce reporting.
- Analytics for decision support across Time and Productivity (for Sales force, Field Staff).
- Integrated with incentives management, motivates employees with additional incentives attached based on work time.
- NO dependency on other hardware devices, biometric devices or registers etc.
