A single oven for gastronomy,
pastry and bread

**HOW DO YOU ENVISION YOUR
WORK IN THE FUTURE?**

WE CAN ALREADY SEE IT

WE ARE WAITING FOR YOU IN THE FUTURE

In the future, you will control technology around you with a simple touch.

Intelligent, interconnected and forward-looking technologies designed to contain consumption will simplify your life, intuitively scheduling your day so that you can perform multiple tasks simultaneously and be more productive. You will communicate through interactive images that will help you in your daily choices, always leaving you the freedom to do things as you wish.

Through the Cloud, you can check that everything works perfectly and explore the best that this innovative technology has to offer.

EXPLORA

THE FUTURE NOW

We have explored the latest technologies to give you something you've never seen.

Forget the simple professional oven:
every Explora oven is a smart and interconnected appliance,
that can be **controlled and programmed through a Smartphone, tablet or PC** and allows handling all your daily and special activities.

EON: CONNECT TO THE FUTURE

A UNIQUE CLOUD OF ITS KIND

Remote control

Web App for remote control accessible from any device.

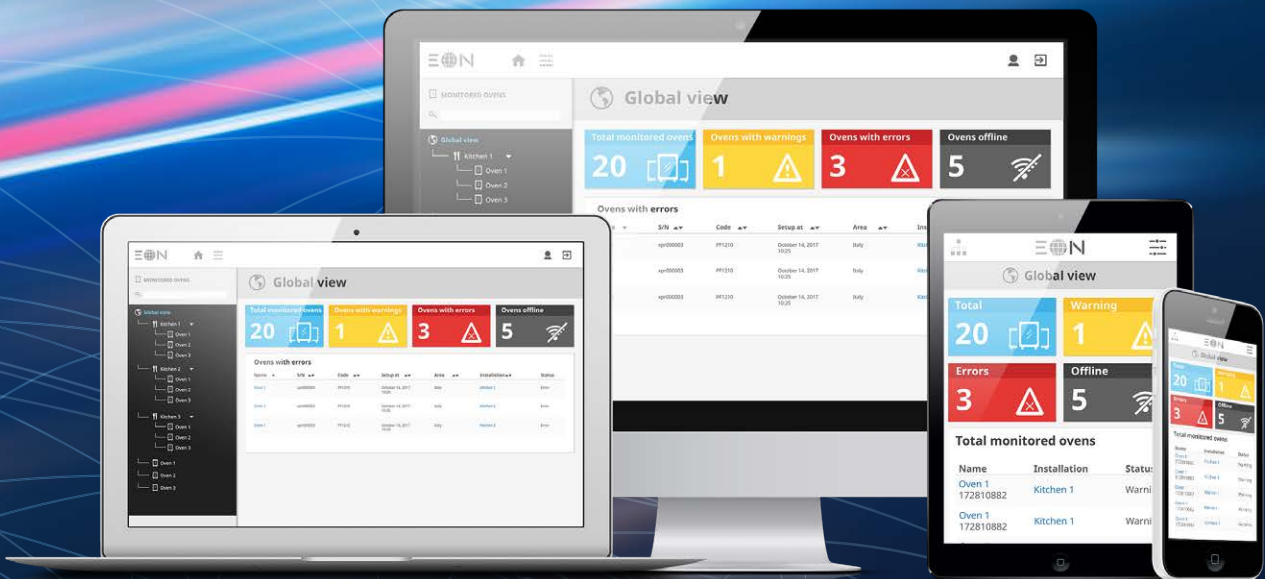

Diagnostic management:

- Continuous monitoring of correct operation.
- Predictive component wear-and-tear analysis.
- Consumption monitoring.
- Advanced diagnosis of malfunctions.
- Access the historical record and ongoing activities in real time.

EXPLORA CLOUD SYSTEM

NONE IS ON THE MARGINS OUR PARTNERS AT THE CENTRE

The EON Web App is fully designed to meet the needs of our retailers. Thanks to its intuitive and accessible technology, **it provides real-time customer service**, greatly reducing costs and time for on-call services.

It is a precious tool that allows our partners offering cutting-edge and highly loyal service. At your disposal, an exclusive engine to increase your business.

TOTAL FLAT TOUCH DESIGN

TECHNOLOGY MEETS
THE STYLE OF THE FUTURE

EXPLORA^{KT}

colombo

**We designed ovens with a unique design,
not only for aesthetic pleasure, but to give you
a unique experience.**

Because there isn't just an operation in a job like yours: every movement and every action are ingredients of recipes that only look to perfection. We want Explora to bring beauty to your kitchen with every single gesture.

ENERGY BALANCE

CONSUMPTION MONITORING

Monitoring means saving.
All Explora oven consumption is
controlled and controllable.

LED LIGHTS

These lights give you better visibility in the
cooking chamber, last longer
and consume less energy.

TRIPLE GLASS

It combines the reduction of thermal
dispersion with control card protection.

Explora's solutions optimize consumption, reduce waste, and respect the environment. We transform elements like water, energy and waste time into targeted investments.

HEAT RECOVERY

Steam production optimization system that utilizes the heat of output water.

PERFECT STEAM

No heat drop thanks to the introduction of pre-sprayed hot water.

SUBDIVIDED HEATING ELEMENT

More efficient temperature control with less energy consumption.

ARE YOU READY FOR A 4.0 COOKING EXPERIENCE?

High usability, intuitive functionality and
touch control: the kitchen exceeds SMART.

Control panel

Each Explora oven comes with a capacitive in-glass touch screen, perfectly visible up to two meters away, which will enable to monitor cooking in progress.

Pause function

Thanks to the pause function, you can program a work plan on a daily basis.

Pre-set or customized phases

Explora simplifies cooking programming: thanks to pre-set phases, the operator will only set customized parameters. Explora will think about everything else.

Perfect Timing

A multiple alarm system easily enables multilayer cooking, allowing flexible kitchen work.

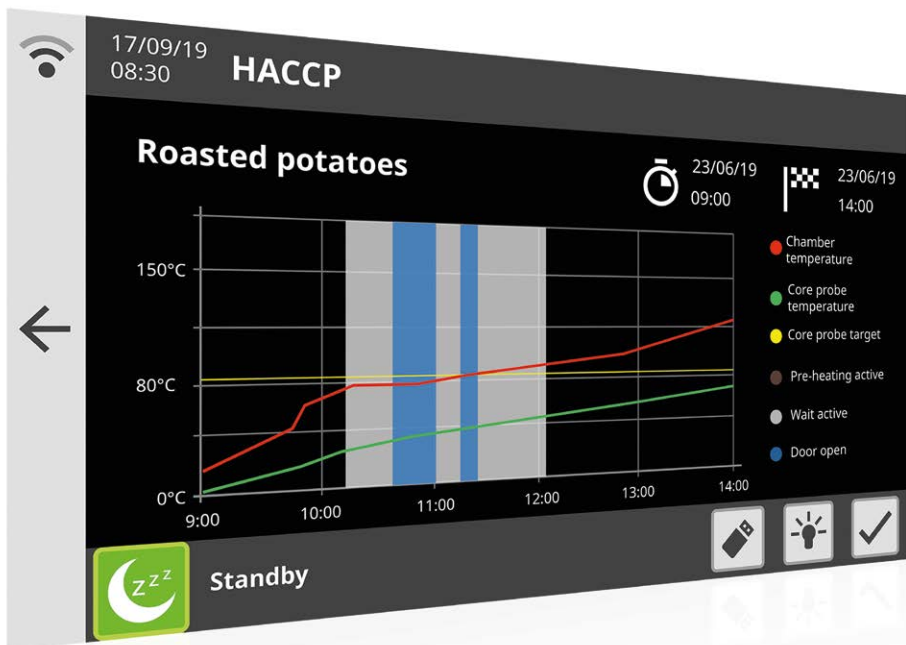

Visual recipes

With Explora, recipes are not just lists of doses, information, and procedures. When you save your favourite recipes, you can enter a picture taken with your smartphone to always have visual support for you and anybody who helps with kitchen chores.

Explora Washing System

Thanks to timed washing, proper appliance maintenance is no longer the operator's burden.

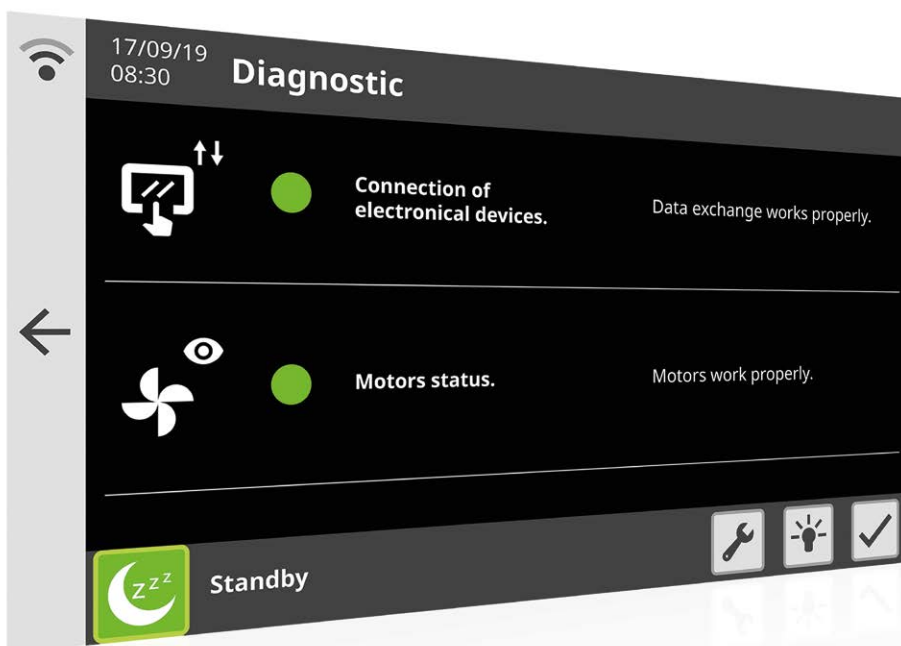

HACCP function

All HACCP data will be continuously recorded on your Explora oven. You can easily save them on a USB drive or print them directly to PDF, even remotely.

Operational record

Directly from your Explora, tablet, or Smartphone, you will have access to the Log of all the operations handled by your appliance at any time. You will be able to select the time range you want, view the details of each activity, and start it again as you set it.

Diagnostics and Service

With Explora, you will monitor at all times, even remotely, all the oven components through a simple and immediate system. You can schedule preventive maintenance operations and will be immediately notified of any malfunction.

Consumption's monitoring

Monitoring of Explora water consumption, electrical consumption and real working hours both from the first access and partial from last reset. You can check with your eyes the using costs of your ovens thanks to our innovative monitoring system.

TECHNOLOGY MEETS DESIGN

SATOR STEAM

The *Sator Steam* technology generates **steam up to 100% saturation in the chamber** through the creation of a fine water mist.

OPTIMAL CLIMATIC

This is a system that **extracts the excess humidity**, maintaining the desired humidity level required.

BALANCED REVERSE

Thanks to a more efficient and balanced rotation's time and using multiple fans with auto-reverse **intensifies the air flow** in the cooking chamber of the oven, guaranteeing a golden uniform result.

The most innovative solutions to give you the best results, with a simple touch.

WATER HEATING SYSTEM

Our **heat recovery system**, coupled with patented Sator Steam technology, enables the efficient and timely use of cooking moisture.

CAPACITIVE DISPLAY

10-inch TFT display in the Performer and Prometeo versions and **7-inch** in Colombo and Colombo KT versions.

UNIVERSAL CHAMBER

Adequately sized **AISI 304** stainless steel chamber for gourmet cookware and pastry.

EXPLORA PERFORMER

Ideal for intensive cooking of chicken, pork and beef

The automatic three-way system for collecting fats and cooking liquids is the ideal solution for all those activities, such as delis and supermarkets, which intensively utilize full-load ovens for cooking meat.

How Explora Performer works

Explora Performer's system collects the grease on the bottom of the oven and automatically conveys it into the appropriate collection tank, contained in the compartment below.

Instead, when the washing is started, the system directs the waste water to the sewage system.

The special grids for ribs and chickens, provided with a teflon-coated tub, avoid splashes and allow collecting the cooking fat, which, through a central hole, is conveyed to the bottom of the oven.

REDUCES WASTE AND IMPROVES COOKING PERFORMANCE

PF1713
Combi steam oven
Performer

PC7600
Condensation hood
(optional)

PM1764
Cabinet with a fat collection system
It includes:
Exhaust kit
Automatic solenoid valve
Grease collection tank

+ 33%

Explora Performer is designed to have greater loading capacity and, consequently, to **increase productivity by more than 33%**. This means that, in the 10-tray model, it will be possible to cook **32 chickens in just 45 minutes!**

EASY AND FAST

The user-friendly control interface and the customisable recipe books allow for **easy use by all operators** and organise the kitchen activities in the best way possible.

- 50%

We have **cut down on water and detergent consumption during oven cleaning activities by 50%** in order to reduce operating costs and the environmental impact, for eco-friendly performance.

TOTAL CONTROL

Thanks to the innovative Eon Cloud platform, you can **monitor and analyse** the electricity, water and detergent consumption of the oven from remote, as well as check all installations, verifying in detail efficiency, productivity and operating costs.

HACCP

All HACCP data is recorded in real time in the new Explora Performer oven. Dates, cooking times, temperature, pre-heating process and number of times the oven door has been opened, all **accurate and precise information which can be easily accessed**.

A colour graph shows the recorded data, which can be stored on a USB unit or printed in PDF form, also from remote, thanks to the Eon Cloud platform.

AUTOMATIC RESIDUE DISPOSAL

Through an automatic system via software, the three-way valve facilitates disposal of foodstuff and cooking grease which, instead of being conveyed to the discharge system, as it is usually done, are instead poured into a tank in order to **further reduce the environmental impact** of our activities.
