

Wiser™

Wiser Ready smart home readiness

Welcome to a modern Wiser Ready home! You can now choose Wiser electrical wiring devices to be pre-installed in your apartment, making it easy to control your home's functions with your own smartphone. You can decide for yourself whether to activate the smart features immediately or later, and you can easily expand the system with new accessories.

Welcome to your new Wiser Ready home!

Your Wiser Ready apartment comes pre-installed with the following Wiser products, which function like standard electrical wiring devices even without a central unit.

Living room:
1 Wiser Exxact dimmer

Main bedroom:
1 Wiser Exxact light switch

The Schneider Electric Wiser Home system requires a central unit (CCT501801), the Wiser Home smartphone app, a user account, and an internet connection. Using the system is free of charge. The resident is responsible for connecting both pre-installed and separately ordered Wiser electrical fittings.
