

BRITAIN'S PATH TO NET ZERO

In the run-up to the UN's COP26 climate change conference in Glasgow this November, the UK government has been promising to 'build back better' and pursue a green recovery. But how is the nation's race to net zero progressing? And, more crucially, how much is the private sector doing to improve the situation?

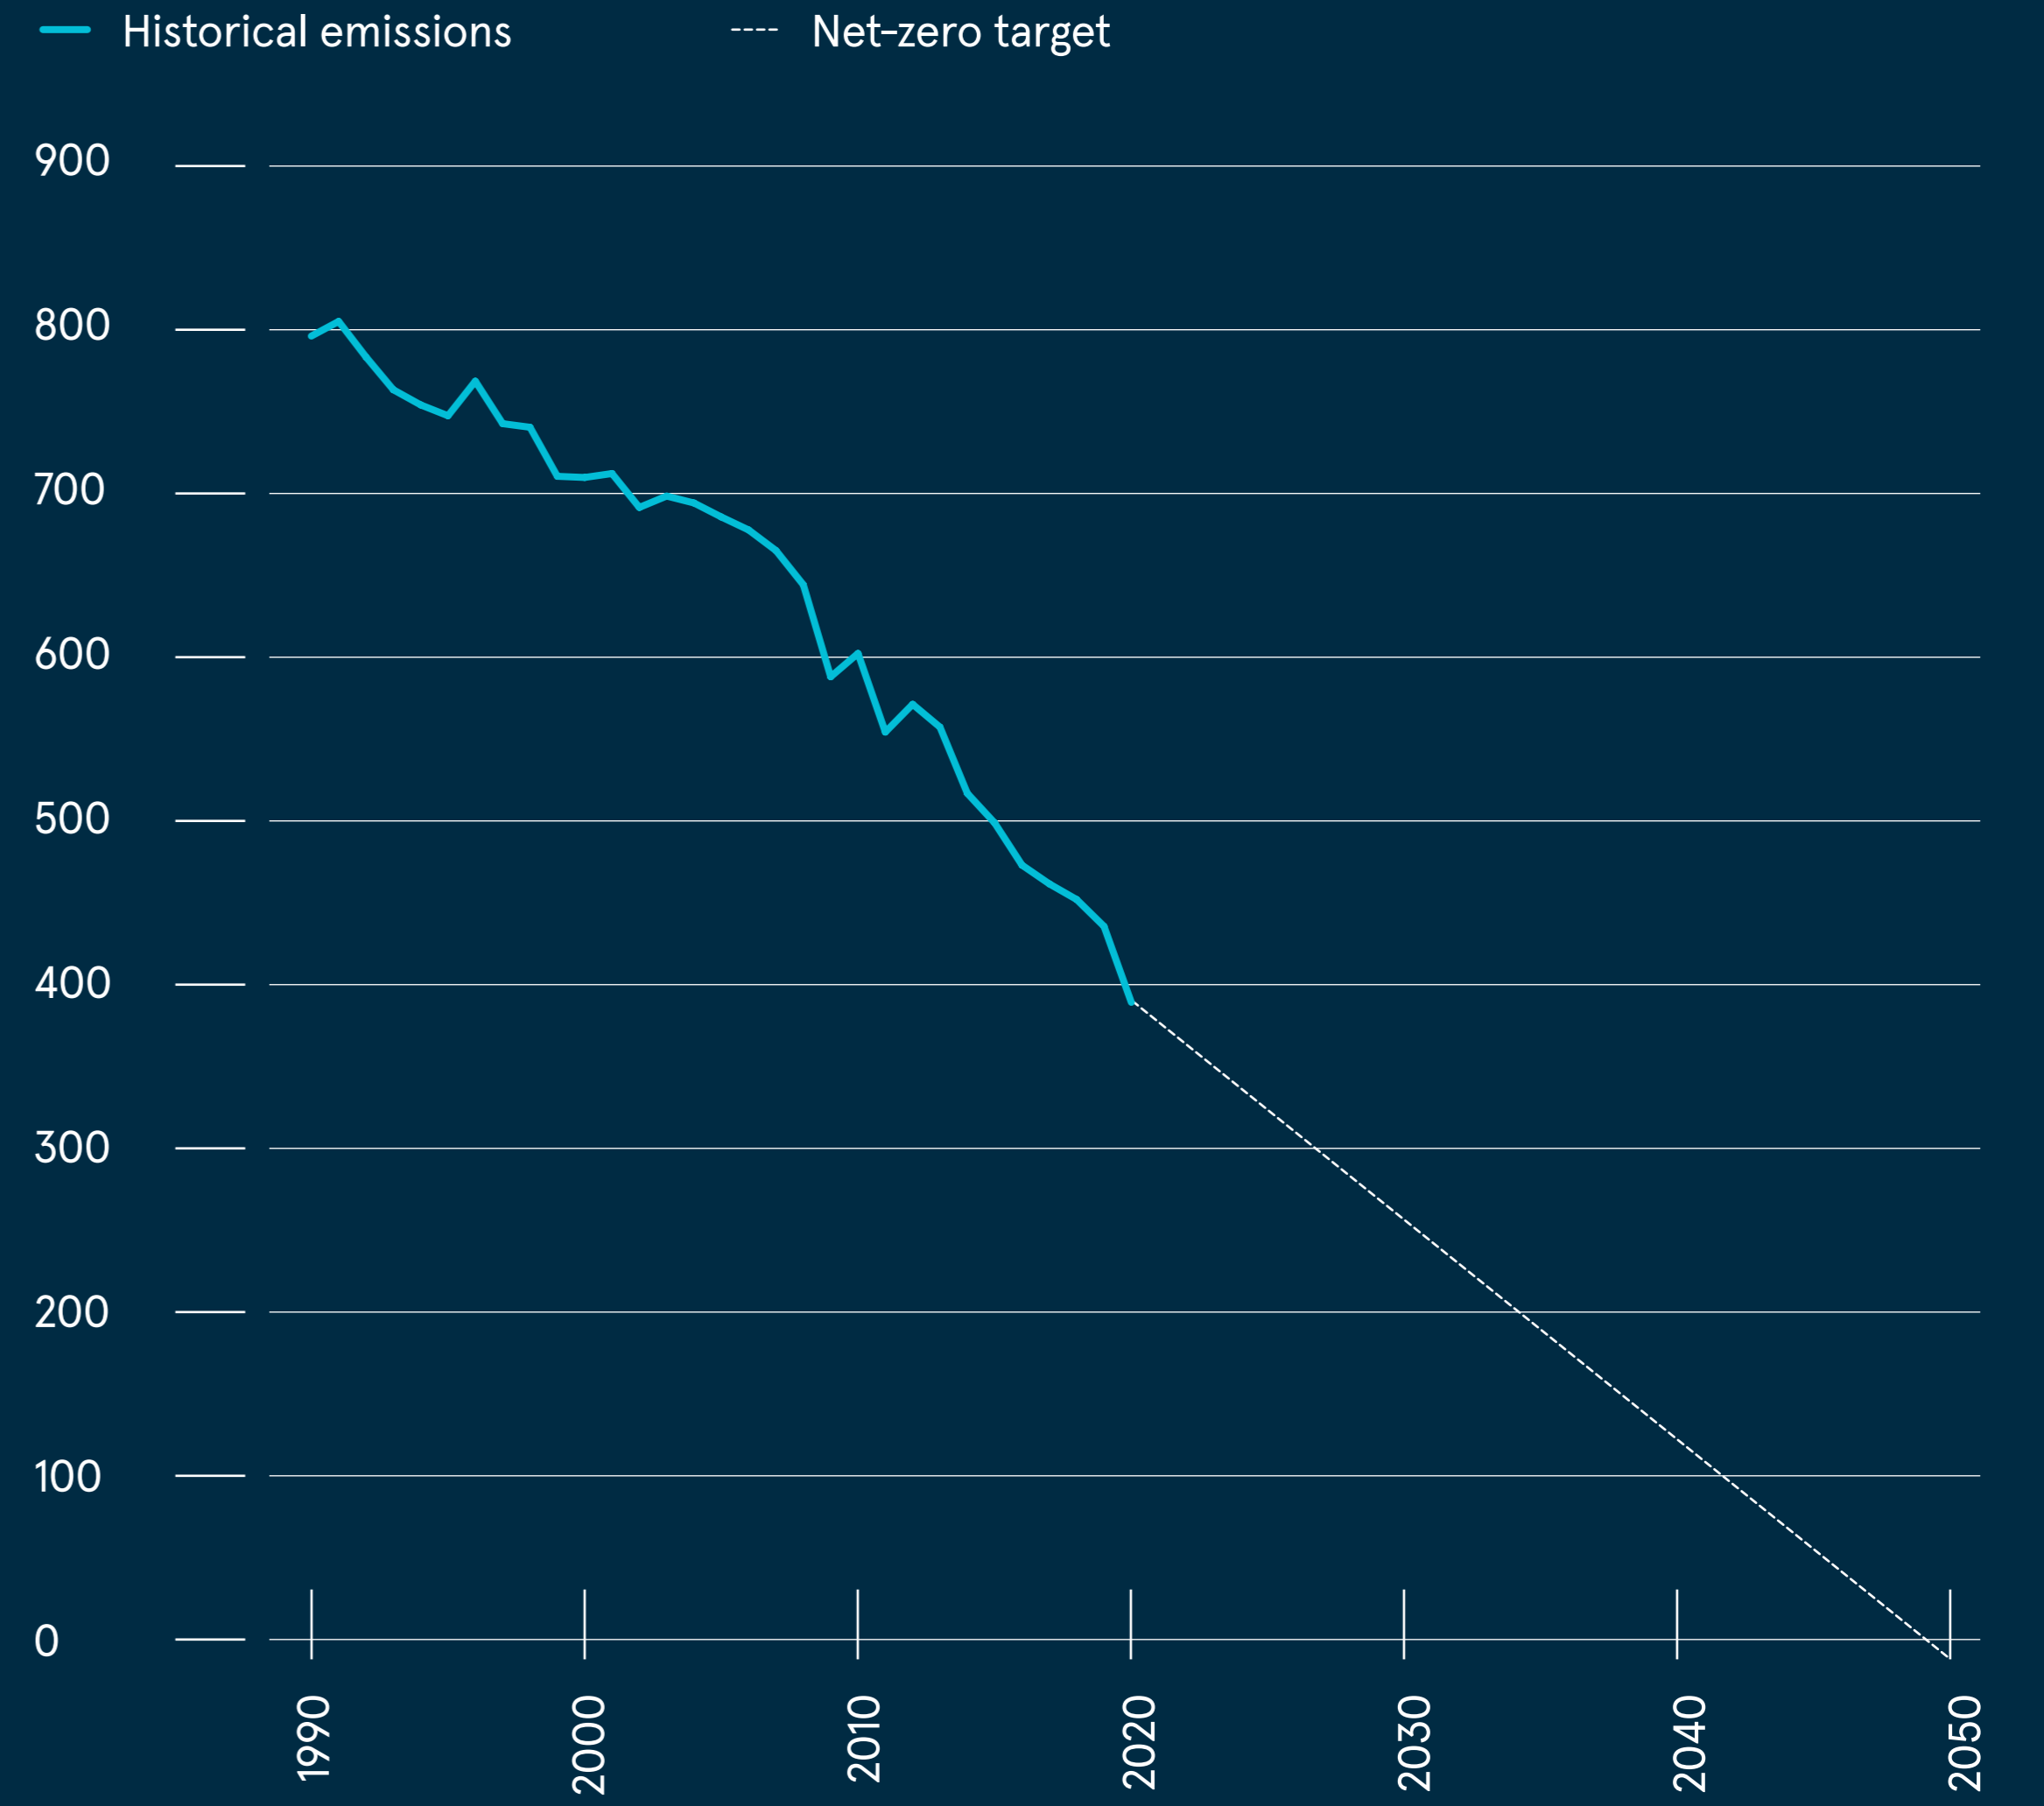

HOW THE UK IS PERFORMING RELATIVE TO OTHER COUNTRIES

Annual emissions per person in selected countries in 2020, relative to the global average (tonnes of CO₂)

THE UK IS WELL ON ITS WAY TO NET ZERO

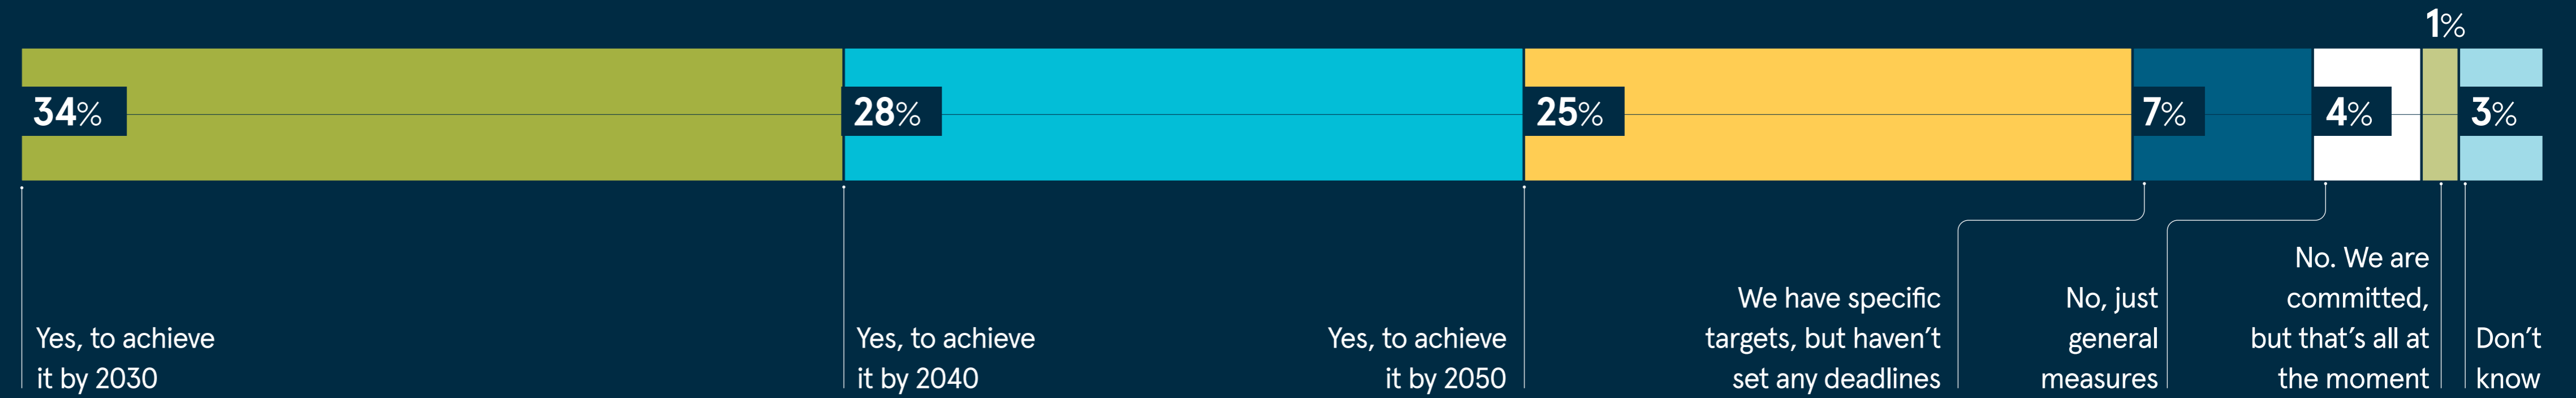

UK territorial greenhouse gas emissions (million tonnes of CO₂ equivalent)

ARE BRITISH BUSINESSES DOING THEIR BIT?

British Standards Institution, 2021

How senior business decision-makers from a range of UK industries answered the question: have specific targets and deadlines been set in your company to achieve net zero emissions?

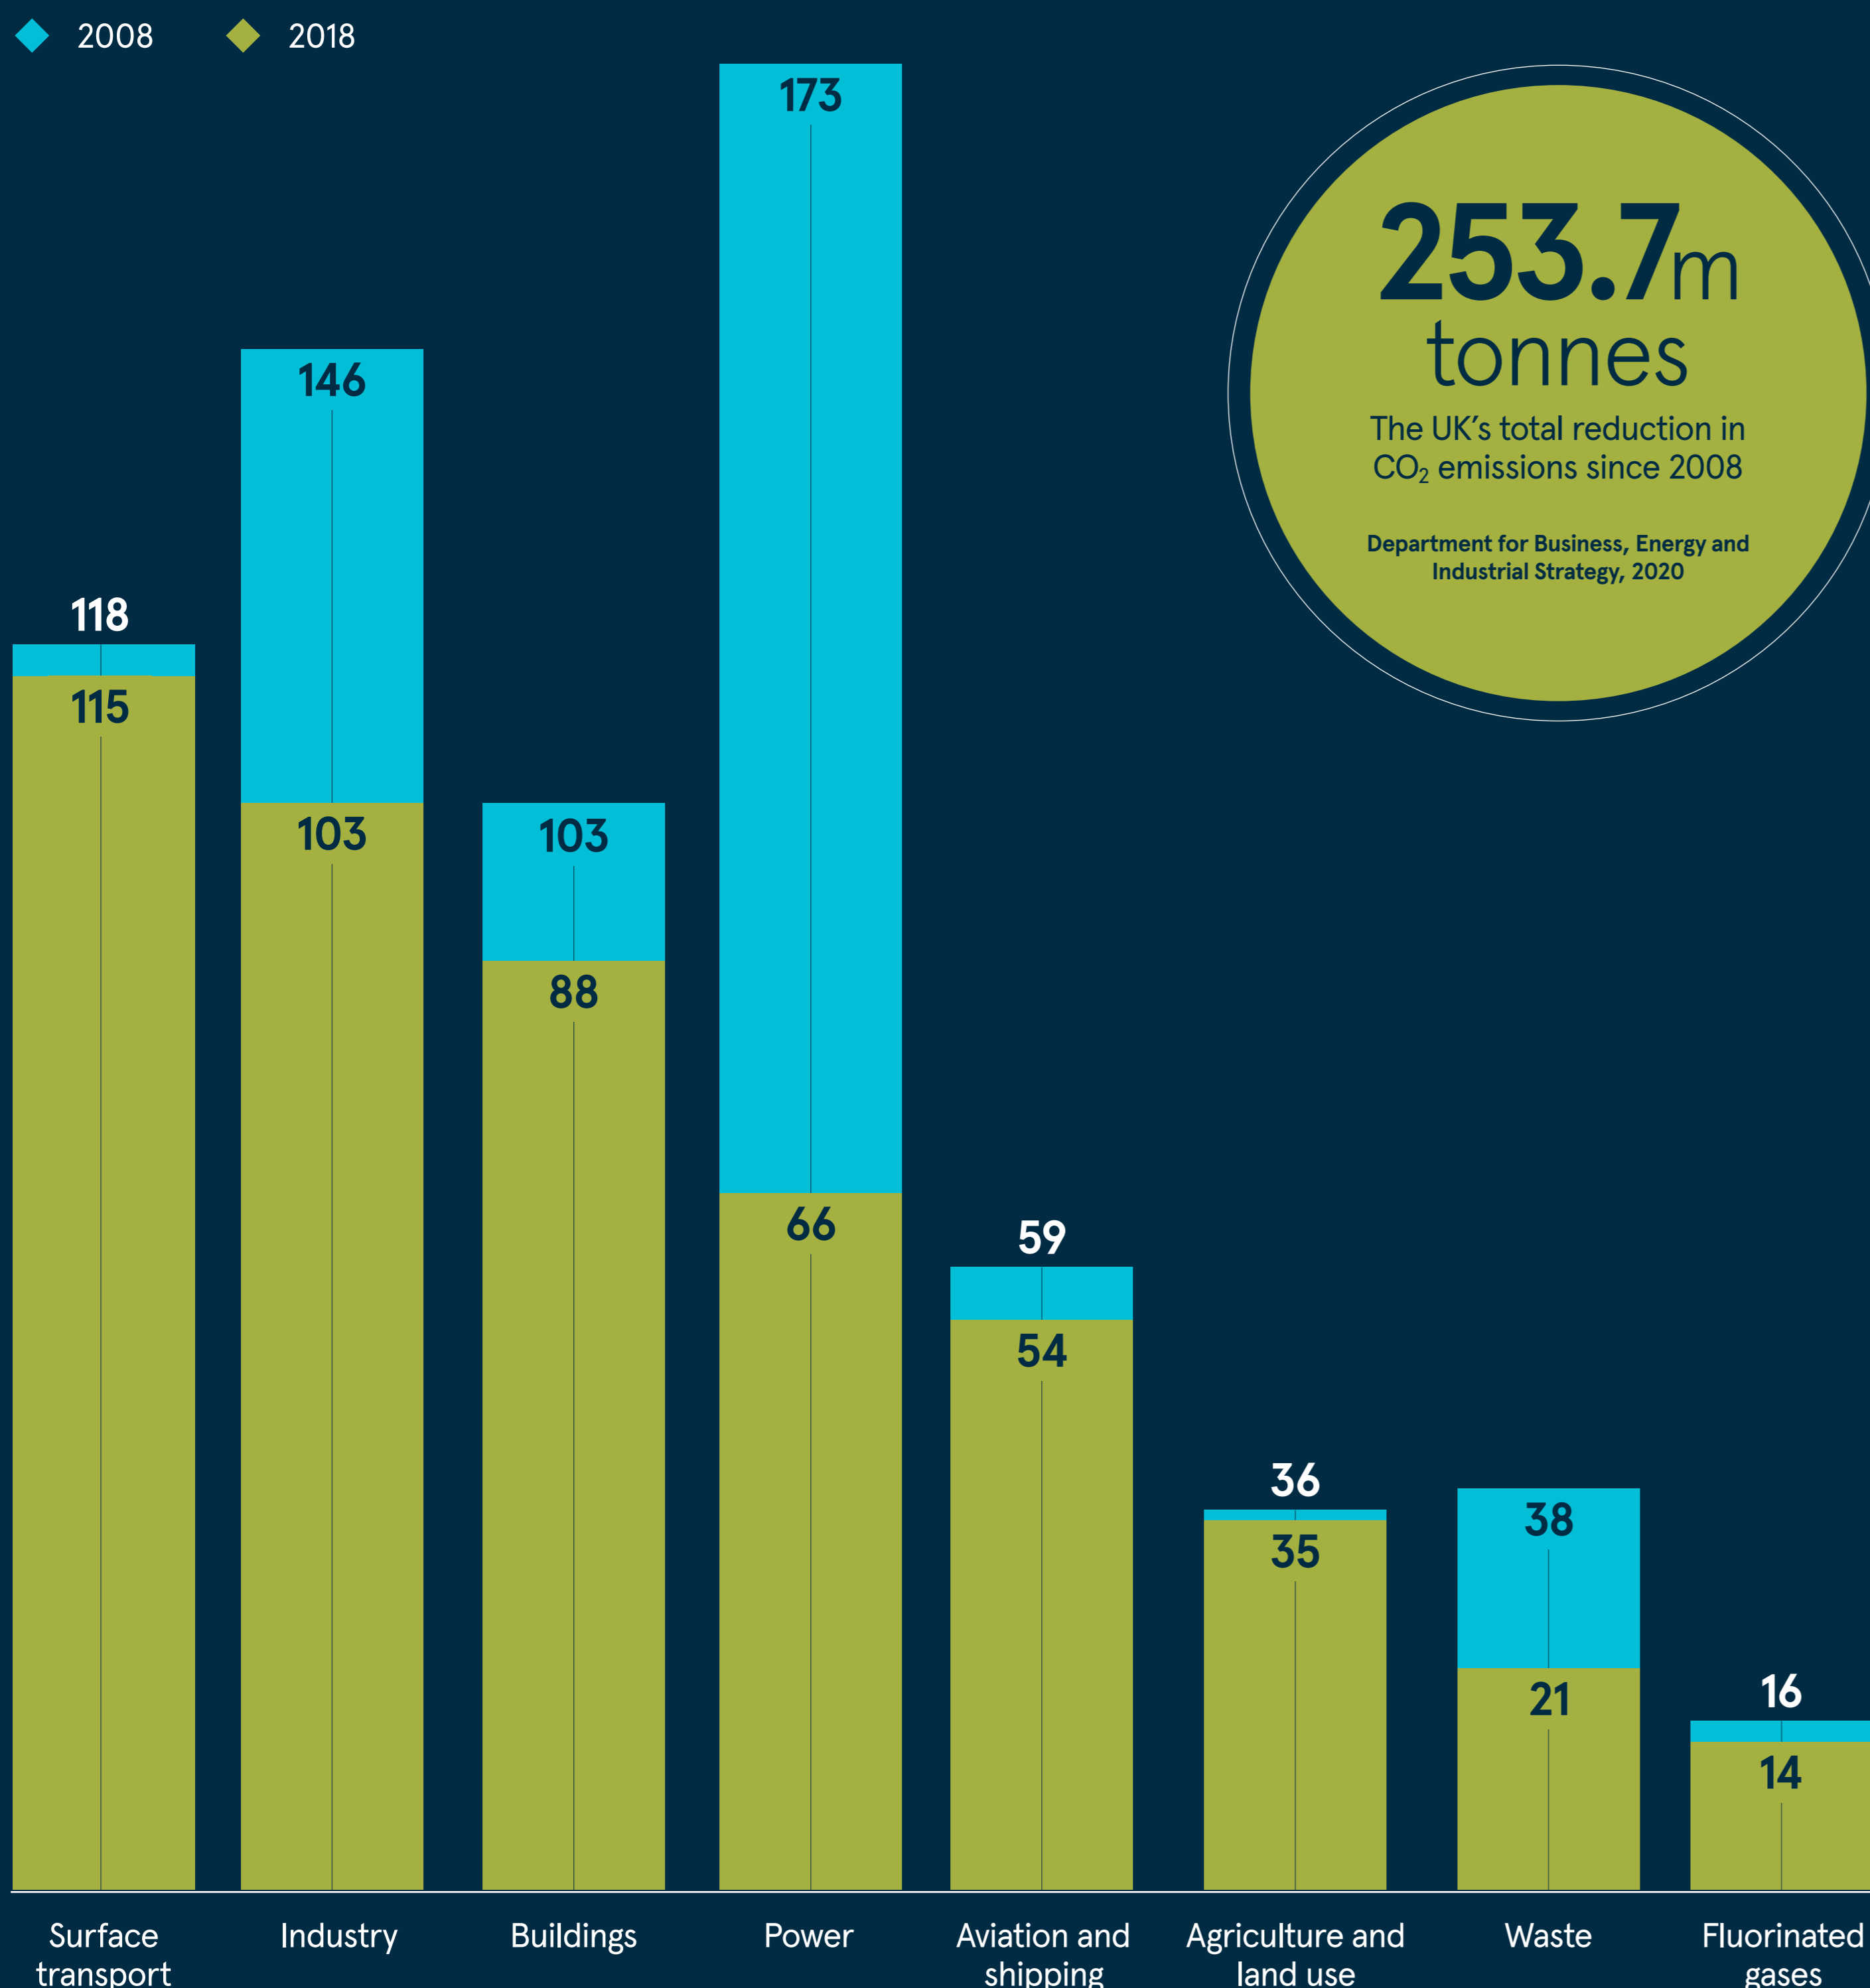

MEASURES TAKEN BY THE UK GOVERNMENT TO SUPPORT A GREEN RECOVERY

WHICH SECTORS ARE MAKING THE NECESSARY CHANGES?

National Audit Office, 2020

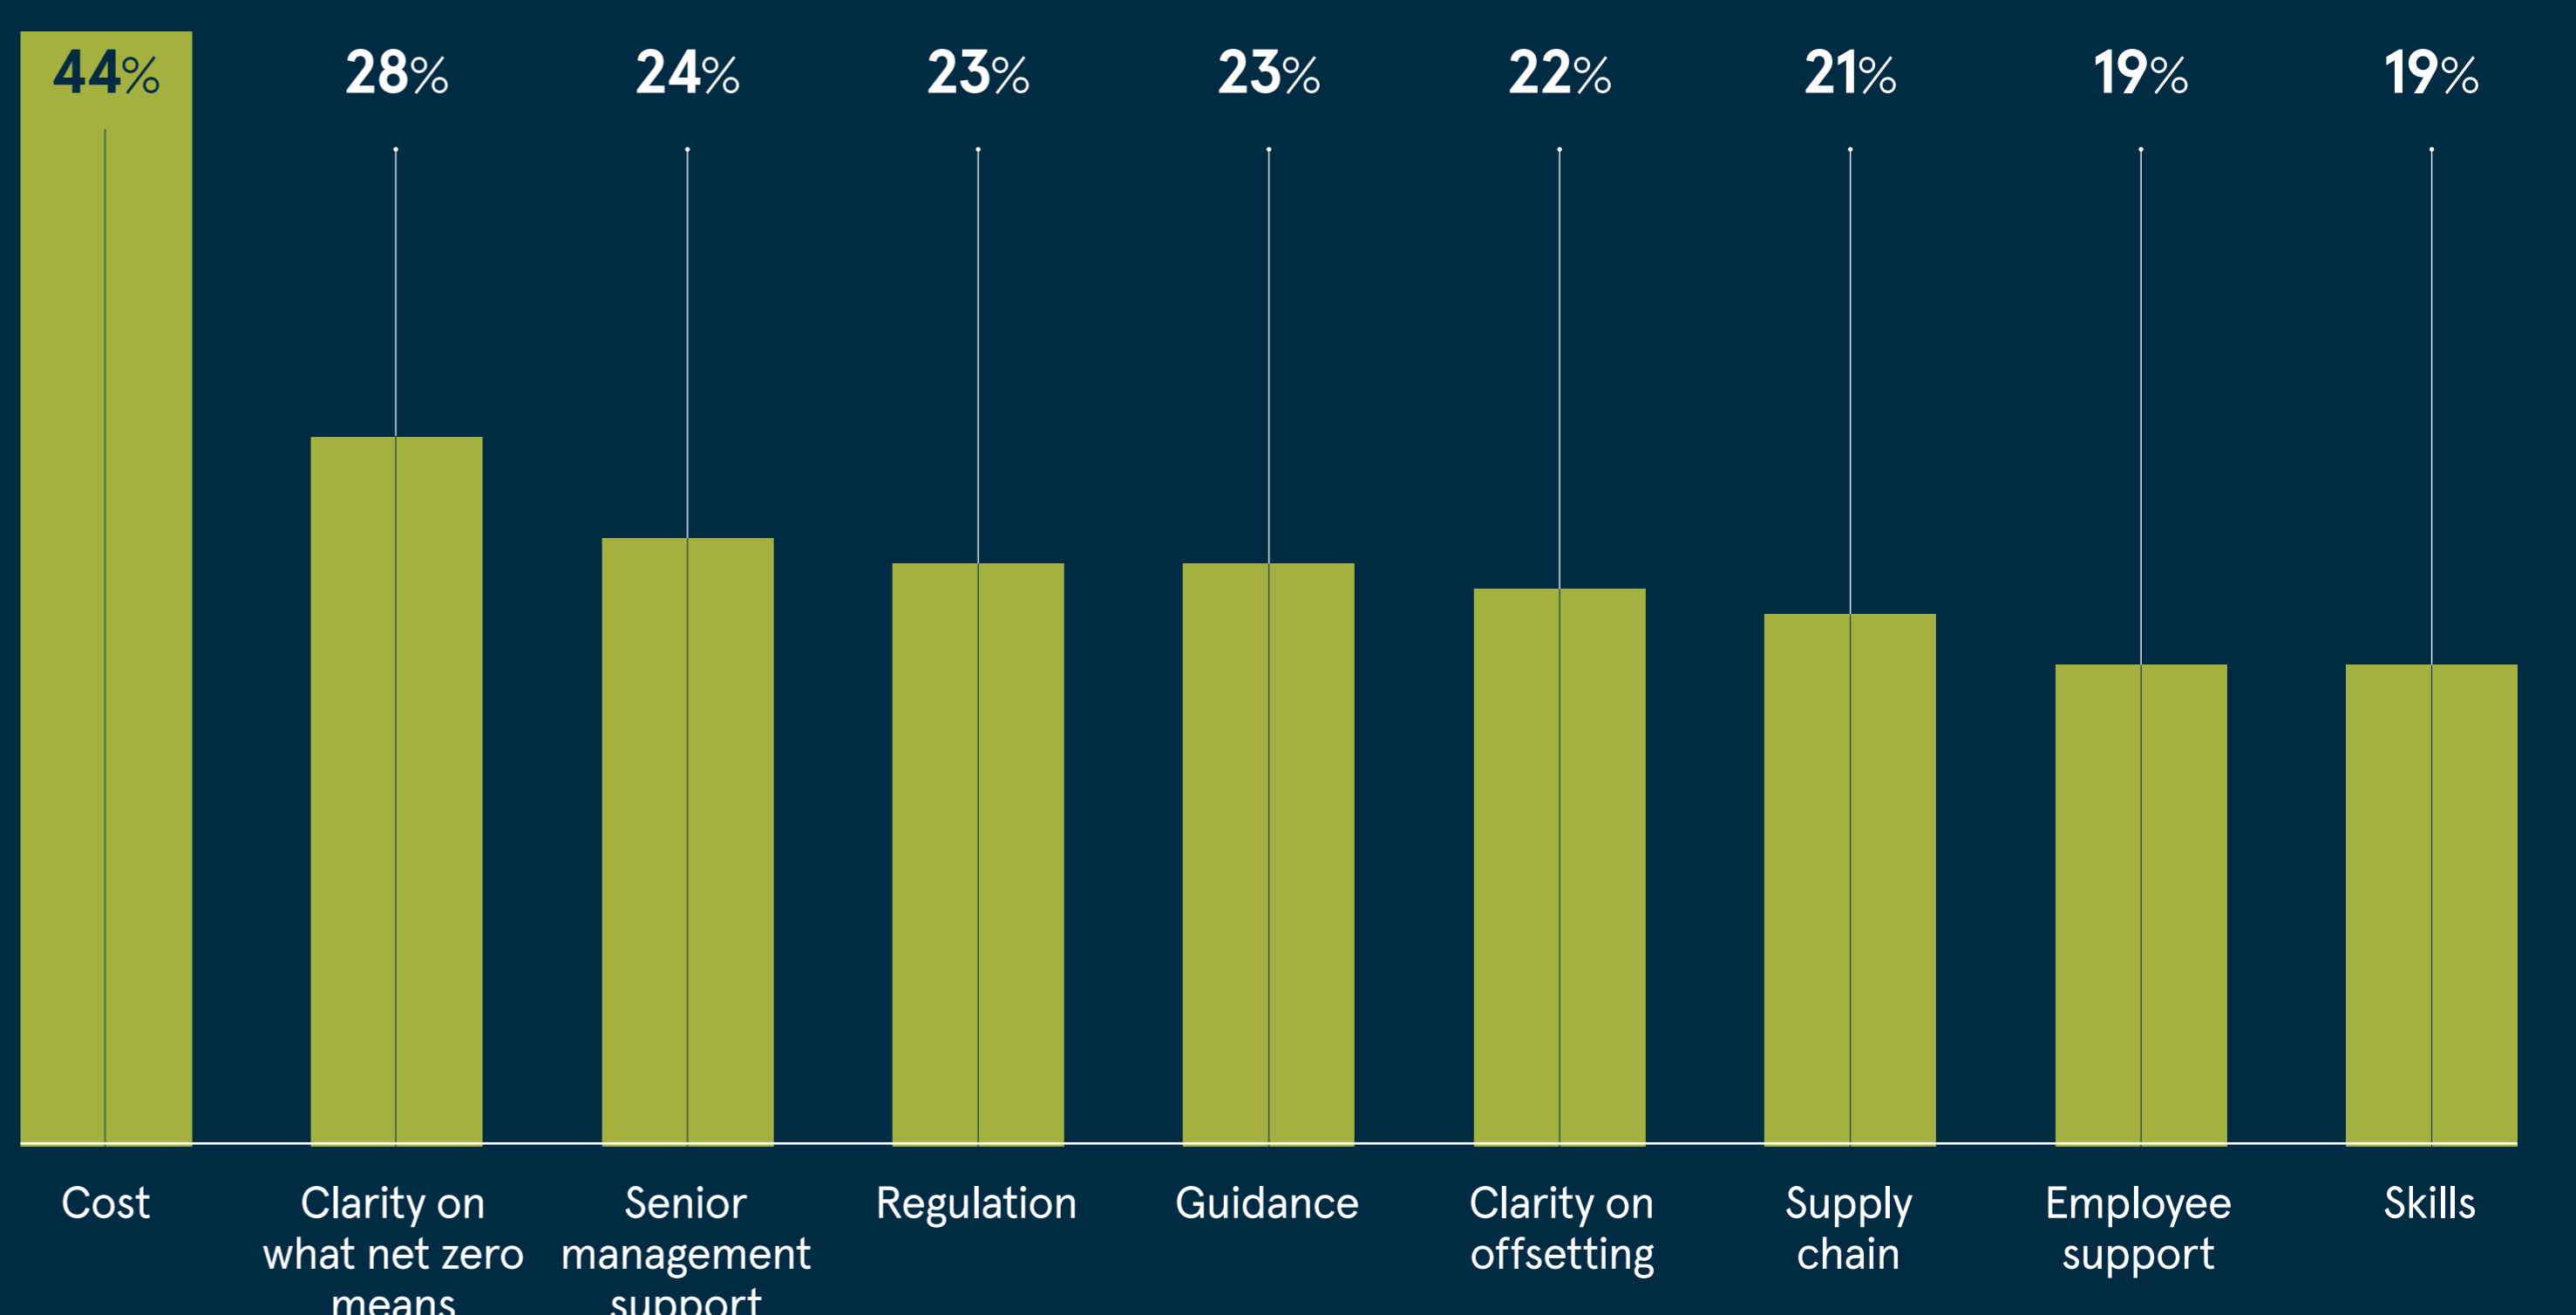

UK emissions reduction by sector, between 2008 and 2018 (million tonnes of CO₂ equivalent)

WHAT IS HOLDING UK BUSINESS BACK?

British Standards Institution, 2021

Percentages of senior business decision-makers from a range of UK industries who believe that the following are barriers to achieving net zero

WHO IS RESPONSIBLE FOR GUIDING BRITISH BUSINESSES?

Percentage of senior business decision-makers across a range of industries in the UK who say the following are the organisations they look to for advice on meeting net zero
