OUR MISSION

Zava is disrupting healthcare. We are on a mission to remove the barriers to people accessing healthcare, such as fear of judgement.

Digital healthcare is the future and about to go mainstream.

Zava has grown fast to become the largest digital healthcare provider in Europe, driven by leaps in technology to radically increase healthcare efficiencies, and backed by patient demand for ease, convenience and discretion.

ABOUT ZAVA

Zava is an online doctor's surgery, offering fast, convenient and reliable access to advice, testing and treatment.

Our qualified GPs treat around 50 conditions where face-to-face examination is not needed, including sexual health issues, men's health conditions, women's health conditions, travel-related requests, as well as chronic illnesses, such as asthma or allergies.

Backed by high patient demand and the latest technology, we have provided over 2 million treatments since 2011 and continue to grow.
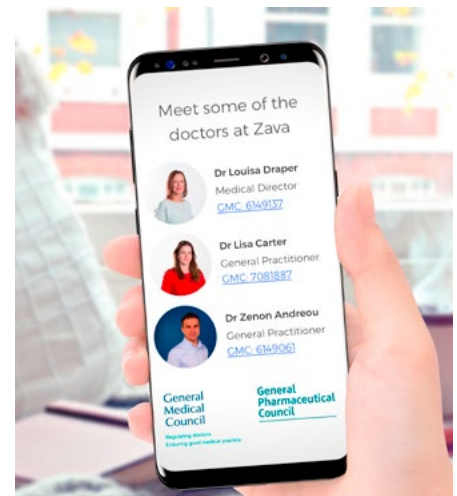

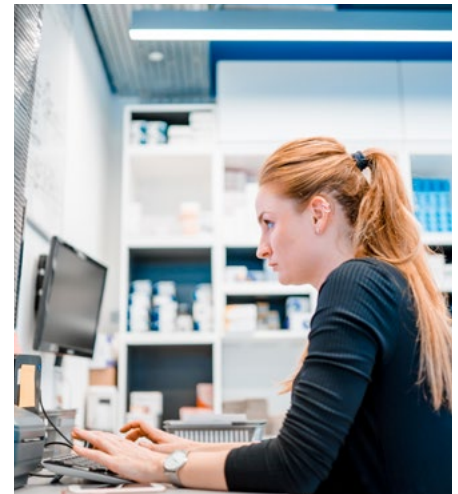

Zava

BENEFITS

Zava uses technology to radically increase healthcare efficiency - we can help the NHS to save money and thrive.

Our software connects doctors with over a hundred patients a day - compared to 40 a day in a standard GP practice.

The benefits for patients are huge. Rather than spending time waiting for an appointment and going into a surgery, patients can receive instant advice from a doctor from the ease of a computer or smartphone, and have medication prescribed and sent to their door via courier within 24 hours.

In line with our mission to stop fear of judgement damaging the world's health, consultations with Zava GPs are mostly undertaken remotely, including online questionnaires, email or over the phone, allowing for greater discretion, for people who may feel uncomfortable speaking to a doctor face to face, due to fear of embarrassment.
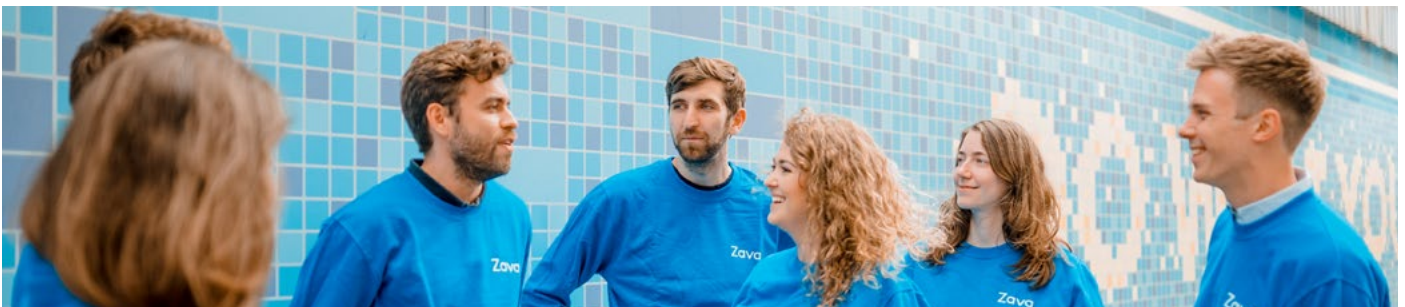

Stigma is preventing many people seeking the medical attention and support they need, which can cause long term damage to people's health and wellbeing.

COMPANY BACKGROUND

Founded by David Meinertz (CEO) and Amit Khutti, Zava employs 125 people and operates in six different markets - the UK, France, Germany, Switzerland, Austria and Ireland.

Headquartered in London, Zava has provided a ground-breaking online doctor service to a leading UK high street pharmacy, since 2014.

CONTACT

If you have any questions or if you would like to receive any of our images, please contact: press@zavamed.com.

Zava's doctors carry out a thorough assessment of each and every patient, using the exact same questions that all GPs would ask.

Zava's model received exceptional patient reviews and has passed multiple regulatory inspections, including an excellent report when we passed our inspection from the Care Quality Commission in 2017.
