

LK-1055

Ro Low Ph Cleaning
Chemical

LK-1066

RO HIGH PH
CLEANING CHEMICAL

LK 1055, 1066 RO Membran chemicals

LK 1055 is low ph cleaning chemicals, acidic in nature
LK 1066 is high ph cleaning chemicals, Alkine in nature
It remove the scale deposit on membrane,
make it fresh and get more product water

Chemical Speciation 1055

PH - 2
Specific gravity - 1.20(±) 0.01
Solid contain 40%

Chemical Speciation 1066

PH - 10 - 12
Specific gravity - 1.10(±) 0.01
Solid contain 30%

Dosage : Use LK 1055 2kgs in 20lit of water

Dosage : Use LK 1066 2kgs in 20lit of water

LK 1044

Ro PH Booster

- ▶ It increase the PH vaule in Product water
- ▶ It mixture combation of food grade chemicals

Chemical Speciation

PH - 10 - 12
Specific gravity - 1.10 (±) 0.01
Solid contain 30%

Dosage : depends on water quality

minara

Plot No. 58, Phase-II, EC Nagar, Charlapally, Hyderabad-500 051.
Ph : 9866600699, 8886799941/42, 7331134031

RO CHEMICALS

Our Products & Services Information

LK 1001

RO High Silica & High TDS

- It is highly Advance technology, with combination of Polyorganophosphonate basic it inhibits all parameter of scale in the water . Ex CaCO_3 , Ca , Mg , SO_4 , NO_3 , Fe_3 , Cl , silica.
- If it use it regularly to Ro Plant never product water flow will not decrease

- Base: Polyorganophosphonate
- Appearance : light pink colour,
- Order : amber
- Status : liquid

Chemical Speciation

PH - 2-3
Specific gravity – 1.10(±) 0.01
Solid contain 30%

Dosage : depends on water quality

LK 1010

RO Antiscalent & Antifouling

- It is highly Advance technology, with combination of Polyorganophosphonate basic
- It also remove the scale on the membrane with out increase the membrane pore (hole) size.
- If remove the scale i.e CaCO_3 , Ca , Mg , SO_4 , NO_3 , Fe_3 , Cl

- Base: Polyorganophosphonate
- Appearance : light pink colour,
- Order : amber
- Status : liquid

Chemical Speciation

PH - 2-3
Specific gravity – 1.05 (±) 0.01
Solid contain 20%

Dosage : depends on water quality

LK 5010

RO Antiscalent

- It acts as a Antiscalent & dispersant . combination of polymers
- It inhibits the Ca , Mg , SO_4 , NO_3

Base: Polymer
Appearance : brown colour,
Order : amber
Status : Viscous liquid

Chemical Speciation

PH – 10 - 12
Specific gravity – 1.03 (±) 0.01
Solid contain 20%

Dosage : depends on water quality

LK 5020

RO Antiscalent

- It acts as a Antiscalent & dispersant combination of polymers
- It inhibits the Ca , Mg , SO_4 , NO_3
- It is superior than 5010

Appearance : brown colour | Order : amber | Status : Viscous liquid

Chemical Speciation

PH – 10 - 12
Specific gravity – 1.05 +- 0.01
Solid contain 25%

Dosage : depends on water quality
